Here is simple trick for finding upper circuit call ■

First check top gainer of today 6% to 20% in (small/mid cap) stocks■

<https://t.co/4pJtazcOYH>

Then use that 5 filters for find out next days UC calls ■

1■stock must be near all time high or 52 week high.

Ex - #Smartlink after BO all time high blasted ■■

#BGRENERGY recently broke 52 weeks high .

2■ Stock should be low market cap less then 10K CR

Ex - #smatlink - 1833 CR

3 Stock should face least resistance after BO (not major resistance after BO)

Ex - #apollomicro

4 It's sector or peers companies must be strong

Ex - #NiftyIT / #apollomicro

U can check their peer companies here

<https://t.co/rVBUAp3LOE>

5 ■ Stock last quarter has given good profit growth Or coming quarter profit growth should be unexpected.

Ex - Kingfa (expected good profit growth)

■By that filters you chances of getting UC stocks are much more ■
