Unicorn Riot [@UR_Ninja](#) and DDoSecrets just published nearly 500gb of data from the neo-Nazi group the Patriot Front. The data includes videos, photos, documents, and chat messages, leaked by an infiltrator with access to their private RocketChat server

You can get a torrent of the data from the DDoSecrets website. (Twitter still censors direct links to their domain)

Patriot Front

Nearly 500 gigabytes of leaked records from Patriot Front, a U.S.-based neo-Nazi organization with chapters around the country. This leak includes videos, photos, documents, and chat messages.

An infiltrator to Patriot Front was able to get access to their members-only RocketChat server as well as their interview server for candidates. The scrape includes these logs when they could be scraped as well as screenshots when they couldn't. Attachments to the chat messages are included as well as images, documents, and videos from their private Mega folders and Google drive.

When nazis write code they listen on port 1488 (a nazi codeword for "14 words" and "Heil Hitler")

```
🚀 docker-compose.yml
1  version: "3.5"
2
3  services:
4    actcounter:
5      build: .
6      environment:
7        - RC_TOKEN=1488
8        - USER=activist
9        - PASS=lifelibertyvictoryLIFELIBERTYVICTORY
10     restart: always
11     volumes:
12       - ./bolt:/bolt
13     ports:
14       - "1488:1488"
15
```

So this what Detroit area "feds" do in the evenings? <https://t.co/MWZvoiauXP>
