As Promised we will be sharing some Chrome Extensions for #Zerodha users that can help them in their Trading Immensely.

If this list helps. We would highly appreciate a Retweet and Like to further maximise the tweet reach♥■

Let's go!

1. Zerodha Scrip Plus ■

This extension adds a variety of cool features.

■■It stretches the #Zerodha Interface Full-Width.

■■It makes the text appear bold in Market Depth.

■■It automatically calculates your brokerage & taxes and displays them right above your orders Live.♥■

2. Jarvis ■

■■This extension makes it easy to calculate the quantity that you guys can take according to the risk mentioned.

■■It auto fills the quantity to the #zerodha order window once you have defined your risk.

So the lazy traders out there or newbie traders use this!

3. Zerodha Kite Enhancements ■

■■It auto calculates and auto fills the quantity you can buy just by clicking on the amounts below.

■■It adds a hide quickwatch button for real full width access

■■It has 4 levels of zoom for watch list. So you can glance at more data.

Try it!

4. Posizer ■

■■A Clean tool again to calculate how much quantity you should take according to your risk appetite.

■■Auto calculates brokerage charges according to CASH, FNO etc.

Handy tool for newbie traders! Isn't it?

5. Cyborg ■

■■View the most volatile stocks over the last 10seconds, 1minute or 1hour etc in #zerodha kite

■■Sort the stocks in current marketwatch by volatility.

■■Load market watch with list of different index stocks.

Try it in Live Market!
