#Thread "Baan Stambh" of Shri Somnath Mandir is a matter of wonder for the researchers...

There is a pillar in the Premises of the Shri Somnath Mandir, which is known as Baan Stambh. This Pillar is on the south side of the Mandir and overlooks the sea. Researchers tried a lot but they could not know the mystery of this pillar.

The existence of this pillar is mentioned in some ancient books from the 6th century. But no one knows when and who got this pillar built? An arrow has been made on this pillar, whose face is towards the sea.

On this Bann Stambh '■■■■■■■■■■ ■■■■■■ ■■■■■,■■■■■■ ■■■■■■ ■■■■■■■■■■■■■■■■■■■' is written. This means that there is not a single barrier in the straight line from this point of the sea to the South Pole.

It means that there is no mountain or piece of land in this straight line. The surprising thing is that even in that ancient time, how did our ancestors know that there is no obstacle in the sea from this point to the South Pole.
