1/10 What's all this then?

Biotech or biohazard?

A proposed federal lab in Butner would study the world's deadliest diseases

<https://t.co/krnmueAd80>

is it being built there or elsewhere, at Kansas University?

Proposed Bio and Agro-Defense Facility Sites: A 178 Acres B 104 Acres

- ① Federal Correctional Complex
- ② C.A. Dillon Youth Center
- ③ Polk Youth Inst.
- ④ Umstead State Hospital, Polk Correctional Inst., Whitaker School
- ⑤ Umstead Correctional Cntr.
- ⑥ Murdoch School

3/10 National Bio and Agro-Defense Facility

By memo dated December 4, 2008, the Department of Homeland Security named the Kansas site as the preferred location for the NBAF. On January 16, 2009, the record of decision was published in the Federal Register

<https://t.co/eZN5zOgbLv>

4/10 Lucky ole Kansas!

The \$1.25 billion facility is a biosafety level-4 laboratory and will replace the aging Plum Island Animal Disease Center. NBAF is expected to be operational by 2022-2023.

Manhattan, Kansas, was selected as the location for NBAF.

9/10 Plum Island Conspiracy Theories

Dr. Erich Traub is considered by some to be a founding father of Plum Island.

He was brought to the US from Soviet-ruled Germany in 1949 under Project Paperclip because of his expertise in foot and mouth disease.

10/10 FMD, Glanders & Rinderpest

Dr. Traub specialised in:

1. Weaponized foot and mouth disease to be dropped on enemy livestock
2. Rinderpest Virus for use against allied soldiers
3. Glanders, with a particular fascination for L
"organisms that voraciously devour the brain"

11. Plum Island Projects

Five top secret projects were approved for the germ warfare island;

The poster features a background image of Plum Island, a long, narrow island with a sandy beach and green vegetation, surrounded by blue water. At the top left, there are two logos: the Department of Homeland Security logo and the USDA logo. To the right of the Homeland Security logo is the text "Homeland Security" and "Science and Technology". To the right of the USDA logo is the text "U.S. Department of Agriculture" and "Agricultural Research Service". The main title "PLUM ISLAND ANIMAL DISEASE CENTER" is in large, bold, white letters, with "Research Participation Program" in a smaller, italicized font below it. Below the title, there is a paragraph of text describing the center and its research participation program. To the right of this paragraph, there is another paragraph of text stating that the program is administered by the Oak Ridge Institute for Science and Education (ORISE). At the bottom right, there are two links: "Contract Acknowledgement" and "Privacy/Security Notice".

PLUM ISLAND ANIMAL DISEASE CENTER

Research Participation Program

Plum Island Animal Disease Center (PIADC) is a unique facility dedicated to research on foreign animal diseases. The PIADC Research Participation Program aims to provide a variety of educational and research opportunities, including graduate and postdoctoral fellowships, that will result in the development of new knowledge and technology in the control and eradication of foreign animal diseases.

The PIADC Research Participation Program is administered by the Oak Ridge Institute for Science and Education (ORISE).

This is an equal opportunity program open to all qualified persons without regard to race, color, age, religion, sex, national origin, and physical or mental disability.
