My biggest issue investing is giving back too much of good gains. So I've been working on offensive sell rules and this is what I've come up with. Still a work in progress so this is just the beginning.

Use the attached chart for extensions above key moving averages.

Calculate market cap at time of breakout.

Small cap less than 2 Billion

Mid Cap 2-10 Billion

Large over 10 Billion

	Small Cap Leaders		Mid Cap Leaders		Large Cap Leaders	
	Max above 50 day	Max above 200 day	Max above 50 day	Max above 200 day	Max above 50 day	Max above 200 day
Average	51	111	37	81	23	52
Top 10%	79	189	54	128	29	68

Once the average extension above the 200 day is reached. Look back at the uptrend since last breakout and determine which moving average shows the most obvious support. Sell on first close below that moving average.

Can use 10 21 or 50 day. If uncertain use the larger of the two

If the Top 10 extension is reached then stop changes to close below the 10 day.

If price continues up and gets above both 50 and 200 day Top Ten extensions then sell.

Some examples.

NVDA Large Cap break out March 2016

7/11 over 52% use 50 day as stop

11/11 over 68% use 10 day as stop

11/30 closes below 10 day. Sell

AMEH Small Cap break out January 2021

6/15 over 111% use 21 day as stop

7/7 over 189% use 10 day as stop

7/16 closes below 10 day. Sell

DDOG Large Cap break out July 2021

10/29 over 52% use 21 day as stop

11/08 over 68% use 10 day as stop

11/18 closes below 10 day. Sell

MU Large Cap break out November 2020

1/14/21 over 52% use 21 day

1/27/21 closes below 21 day. Sell
