Just got off the phone with a friend of mine ■■■■
His 10 year old daughter was selected to represent her school at the World School Games in dubai.
His daughter was rped by fellow students, video tapped and posted on Instagram and the school concealed it for a month.**

He found out on his own when another parent called his wife and showed his wife the video of his 10 year old daughter being circulated on Instagram.
I have spent the last 1hour listening to confessional statements by some teachers and I am begging this should rather be a dream.
