Same advice as before. Do your research. Google what you need to and prepare.

Teneika Askew | Analytics & ... · 01 May · ⋮

These apprenticeship programs pay YOU starting day ONE to learn tech skills on the job, complete assigned training, be mentored and coached while working full-time with benefits 🚀

Teneika Askew | Analytics & ... · 01 May · ⋮

*Note, these are great opportunities but do your research.

If the salary is not on the job post, I shared averages from Glassdoor or sites on Google (unless I know someone who did the program)

Salaries are increased *typically* after successful completion of apprenticeship too
