5 PREDICTIONS OF KALI YUGA

Told By Lord Krishna to Pandavas

As everyone is aware, Krishna is Lord Vishnu's eighth manifestation. Lord Krishna told the Pandavas five predictions about the Kali Yuga at the time of the Mahabharata War.

The Pandava was once instructed by Krishna to travel in five different directions and return with any strange sights so that he could explain how the signs of the kali yuga were there.

5 Predictions of Kali Yuga Told by Lord Krishna to Pandavas

What Yudhisthira saw?

To his surprise, Yudhisthira spotted an elephant with two trunks.

According to Krishna, the elephant with two trunks represented the kings of the Kali Yuga. They would say one thing and do another, taking advantage of people in both ways.

What Arjuna saw?

Arjuna observed a bird consuming an animal's flesh while also having Vedic Mantras engraved on its wings. He was astounded to see a divine bird perform such a deed.

According to Krishna, priests in the Kali Yuga will undoubtedly perform religious responsibilities and act in a highly knowledgeable manner. On the other hand, they would crave worldly pleasures and take advantage of the followers.

People would constantly want other people to pass away so they can inherit their fortune. No matter how large a human becomes, he will always have a desire for the possessions of other creatures.

What Bhima Saw?

A cow that was about to give birth was spotted by Bhima. The cow began licking the calf shortly after giving delivery. To his surprise, the cow continued to lick the calf even after it was clean.

People made a considerable effort to take the calf from its mother, but by that point it had suffered serious injuries.

According to Krishna, it represents how much people will love children throughout the Kali Yuga. that love itself will obliterate the children's potential, life goals, and future. Their spiritual lives would be entirely disregarded.

What Shaddeva Saw?

Sahadeva observed that there were four wells on either side of the central well. The four wells were filled to the brim with water, seemingly unable to contain it, but the one in the middle was absolutely dry. The scene astounded him.

The empty well represents that the poor shall coexist with the wealthy, according to Lord Shri Krishna. The wealthy will have enormous wealth and prosperity that will keep growing and overflowing, but they will not give the poor people even a single cent.

They won't give it to those in need or who are suffering; instead, they will waste the money on themselves.

What Nakula Saw?

Nakula witnessed a large boulder tumbling from a hill. It was halted by a small plant that was in its path since it could not have been stopped by the large trees or other rocks on the way down. The scene astounded him.

According to Lord Shri Krishna, the falling rock represented how humans will live throughout the Kali Yuga. People will lose their integrity if they continue to demolish and smash everything in their path to prosperity.

However, they would be unable to find contentment or peace of mind by anything other than reciting the Lord's tiny but all-pervasive name.

They can hold them out of the room with just one call to God's name.
