

The eight unique features in the murti of Anjaneya in this Mandir are:-

\* Right hand in Varada mudra that tells Bhaktas not to fear

\* Gada in left hand symbolises that there is no defeat for those who surrender to Anjaneya

\* Lakshmi kataksham- Ma Lakshmi is in right hand

\* Face facing west- brought Sanjivani from this direction, signifies cure from physical/mental ills

\* Feet facing south (direction of Yama)- means protection from untimely death

\* Rudramsam- Hanuman is within the shape of shivling (means Shiva's powers are embodied in him)

\* Tail facing North- all 9 planets reside on Anjaneya's tail. North is also Kuber's (God of wealth) direction. Worshipping tail gives prosperity and helps lessen bad planetary effects

\* Eyes- from whichever direction one sees, Hanuman Ji's eyes seem to look in that direction
