Six tools that will change the way your write code: ■

1■■ HarperDB

Deciding between SQL and NoSQL? Use HarperDB as it provides you the functionality of both.

Access data using API endpoint.

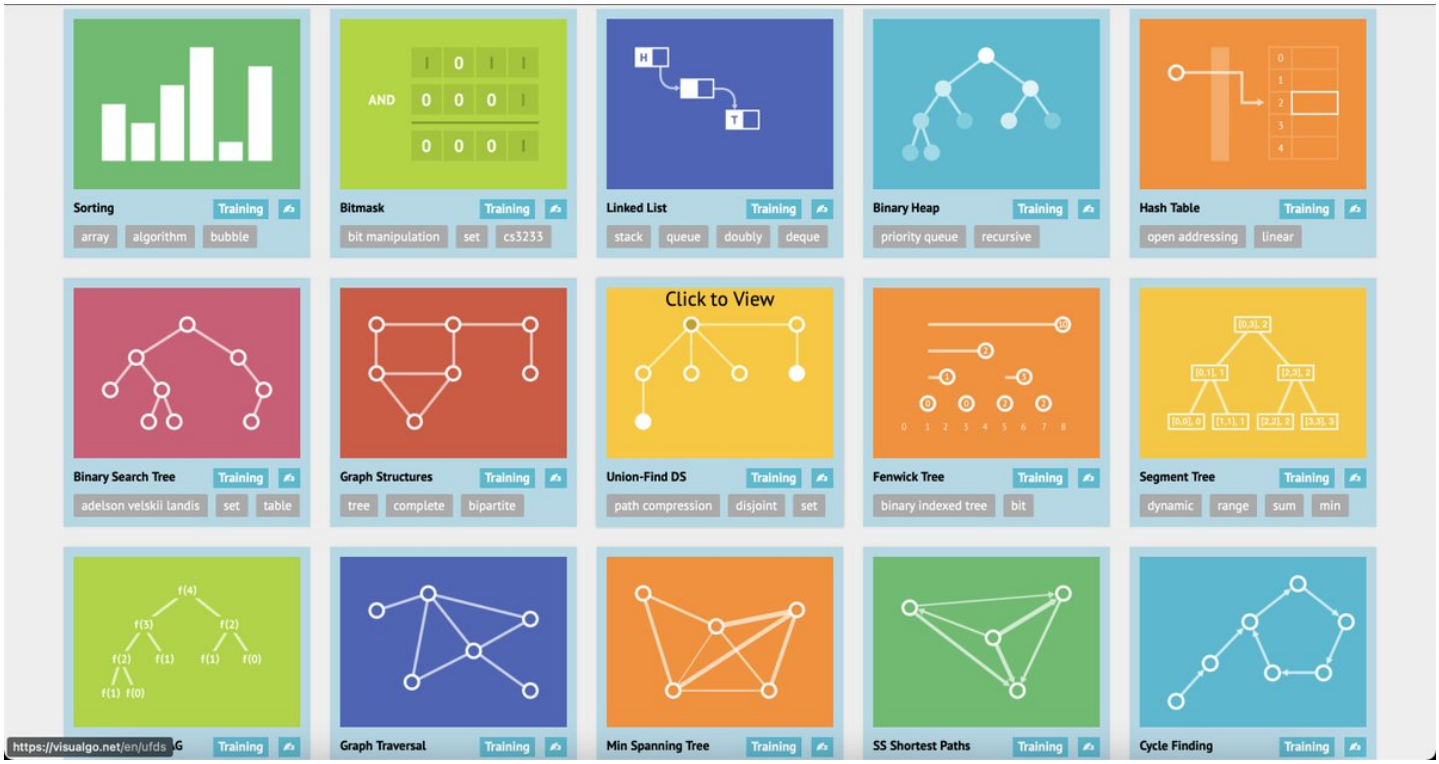

■ https://t.co/qf5CalexfA

2■■ Visual Go

Visualizing data structures and algorithms

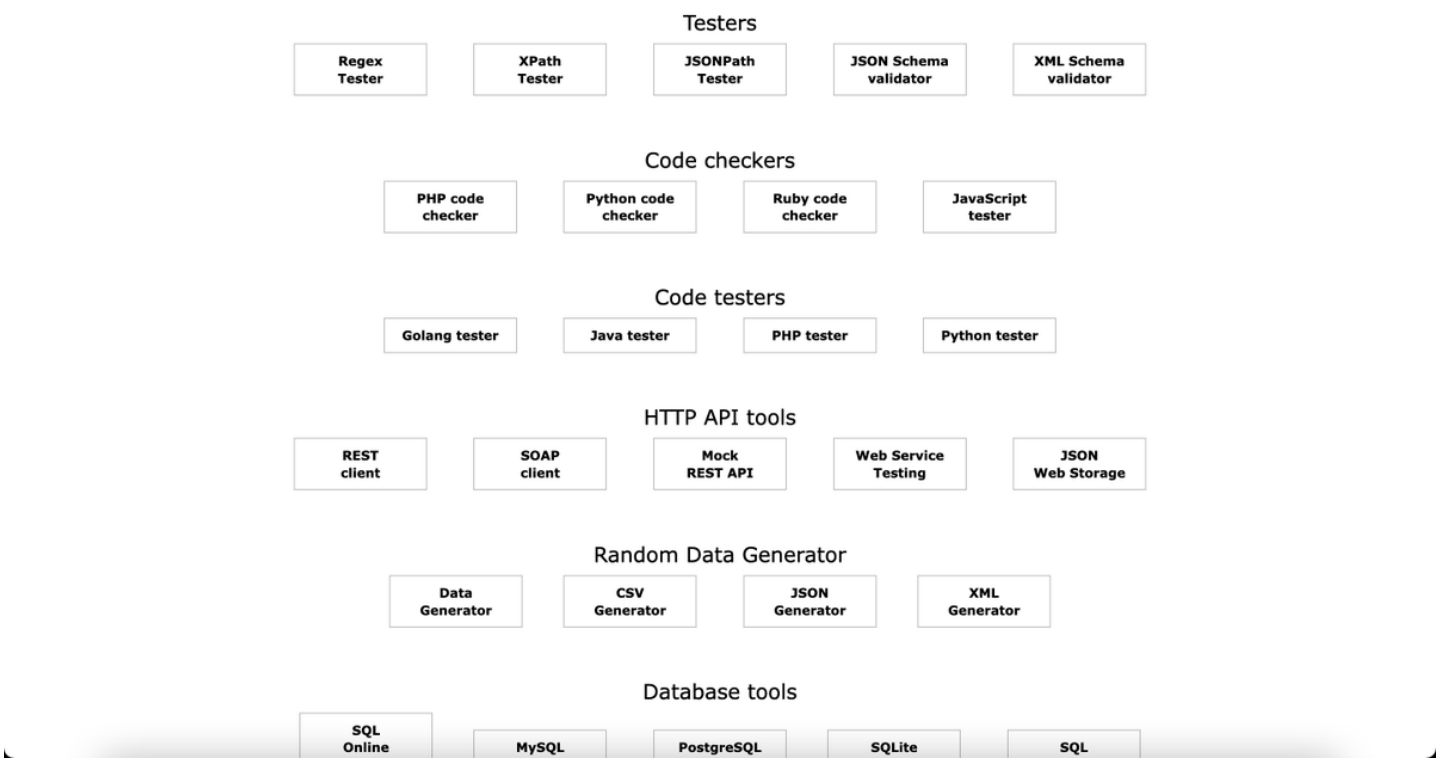

■ https://t.co/b8YeMYdOaf

3■■ Extends Class

Syntax validators, code formatter, testers, HTTP clients, mock server, and much more.

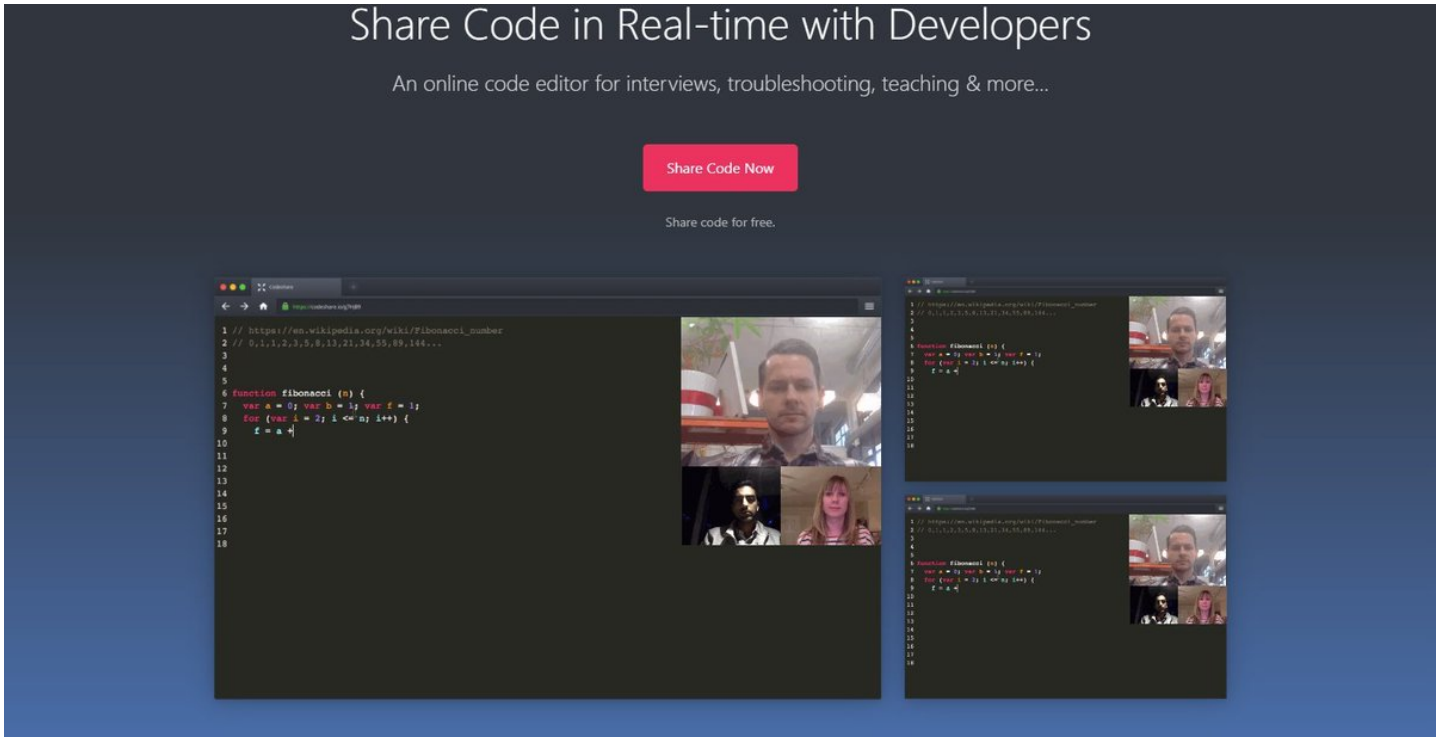

■ https://t.co/GlKjoBnzgg

4■■ Codeshare

Share Code in Real-time with Developers. An online editor for teaching and interviewing.

■ https://t.co/2m1Ne3KJRK

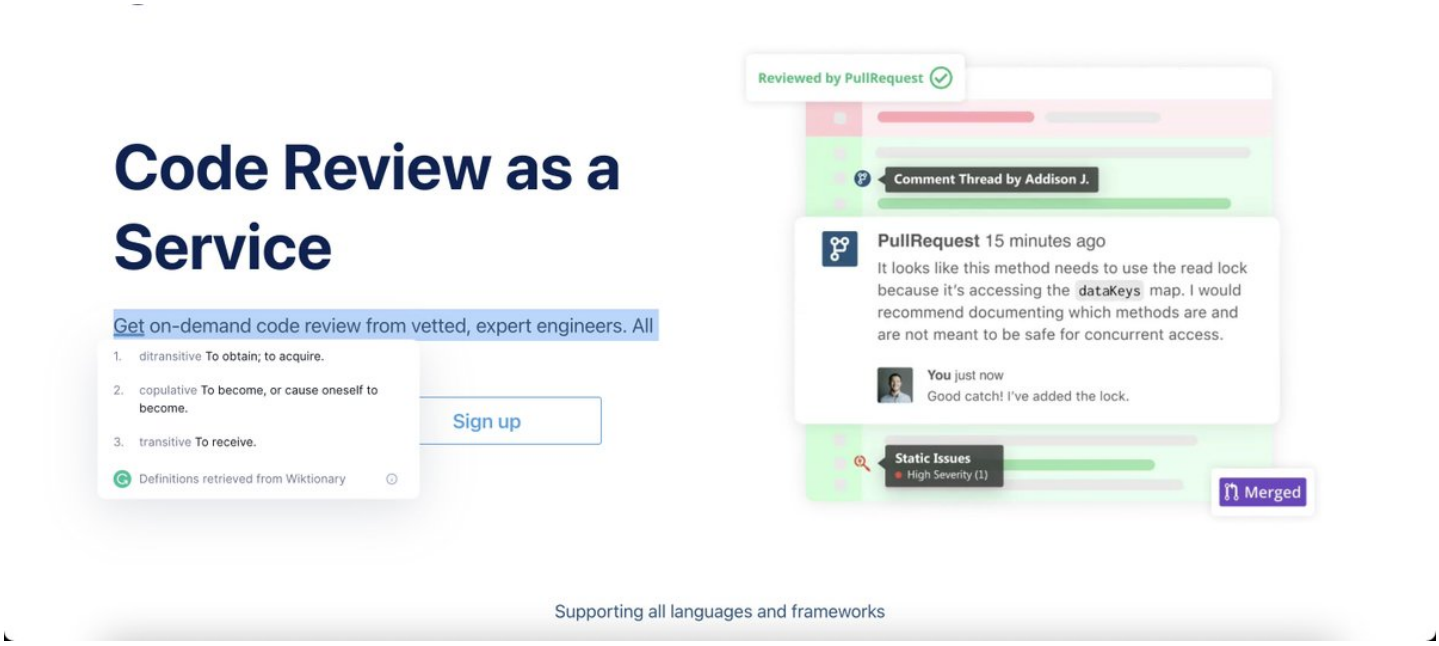

5■■ Pull Request

Code Review as a Service.

Get on-demand code reviews from expert engineers and developers.

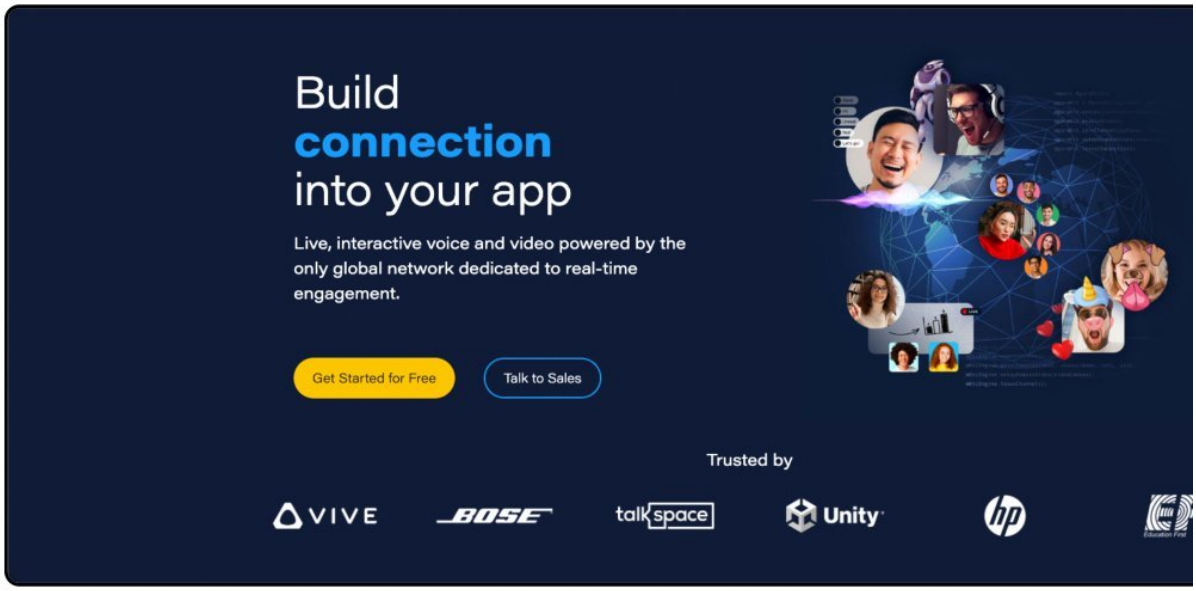

■ https://t.co/ItSexM7HRV

6■■ Agora

Integrate Live Streaming or video chat into your website.

■ https://t.co/78gSD2ISa0

End of this thread.

Add more amazing developer tools below. ■■
