Finding good courses is challenging.

Here are five courses on JavaScript, Python, and Go you can consider in 2022.

Thread ■

1■■ Basic JavaScript

Interactive learning will help you understand the basic concepts of JavaScript quickly.

• Introduction
• Variables
• Comparisons
• Loops

■ https://t.co/41k7PJYHt6

2■■ Advance JavaScript

Understanding complex concepts of JavaScript is the with exercises and challenges.

• Functions
• Arrays
• Objects

■ https://t.co/kXGmUPaGWl

3■■ Python

You'll get hands-on practice with all the building blocks to ensure you excel as a Pythonista.

■ https://t.co/0zsoC06idi

4■■ DS and Algo in Python

Algorithms are tough to master. But this course made it easy with code samples and quizzes.

■ https://t.co/2Q5MXGu3Od

5■■ Go

Learning Go is not a wrong choice in 2022 as it is one of the most popular languages this year.

■ https://t.co/nCaGJ47HKU

With that said, that's pretty much it for this thread.

Huge thanks to @wagslane for building https://t.co/lib3bSnYYN, an awesome platform for developers. #collab.
