Five free VS Code extensions that will change the way you do web development:

1. RapidAPI Client

Fulfill all your need for API development.

- Test and consume APIs
- Work with your VS Code theme
- Generate TypeScript, Swift, and Python interfaces from responses.
- <u>https://t.co/FR0QhyTi8v</u>

RAPIDAPI	□ ₽ Random users data ×	□ …		
Project Default (lo	I) GET V https://jsonplaceholder.typicode.com/t Send >	✓ 200 ОК · 562 ms		
Environments Default Group Production	Description Headers Query Body Auth	Info Request <u>Response</u>		
Requests : Text Sentiment POST https://text-sentiment.p.rapidapi		Headers Text JSON Tree JSON Text Raw		
Random users data GET https://jsonplaceholder.typicode.c Request 3	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$	<pre>1 2 3 "id": 1, 4 "name": "Leanne Graham", 5 "username": "Bret", 6 "email": "Sincere@april.biz", 7 "address": { 8 "street": "Kulas Light", 9 "suite": "Apt. 556", 10 "city": "Gwenborough", 11 "zipcode": "92998-3874", 12 "geo": {</pre>		
GET rapidapi.com/hub				
Give feedback 🖄				
Version: v0.0.2739559	Request snippet TypeScript (Fetch) V I	JSON to TypeScript V (>		

2. Better Comments

Create more human-friendly comments in your code.

- Alerts
- Queries
- TODOs
- Highlights
- https://t.co/AV2BwAMAIL

≣ Extension: Better	Comments ×		□ …
	Better Comments v3.0.0 Aaron Bond (20) 3,362,437 ***** (142) Improve your code commenting by annotating with alert, informational, TODOs, and Uninstall (2) (2) Details Feature Contributions Changelog Runtime Status	d more!	
	<pre>export class MyClass { /** /** MyMethod * Important information is highlighted * I Deprecated method, do not use *? Should this method be exposed in the public API? * TOOD: refactor this method so that it conforms to the API @param myParam The parameter for this method */ public MyMethod(myParam: any): void { let myVar: number = 123; //* This is highlighted //* This is highlighted //* </pre>	Categories Formatters Extension Resources Marketplace Repository License Aaron Bond

4. Peacock

Do you have a habit of keeping multiple VS Code windows open?

Peacock lets you change the color of your VS code even if multiple instances are open.

https://t.co/bmidPkTQOK

5. CSS Peek

Jump from HTML file to CSS.

Allow peeking to CSS ID and class strings as definitions from html files to respective CSS.

Supports the Symbol Provider, so you can quickly jump to the right CSS code if class or ID are known.

■ <u>https://t.co/EOHw3Yzt1a</u>

Thanks for checking this out.

You can check out my other threads at @PrathKum. I generally write about web development. ■
