Useful GitHub Repositories for Developers

1. Coding Interview University

A complete computer science study plan to become a software engineer.

Required:
• A little experience with coding (variables, loops, methods/functions, etc)
• Patience
• Time

https://t.co/MyrecTx4HN

{ 1/6 }

2. Public APIs

A collective list of free APIs for use in software and web development.

It includes APIs for
• Authentication
• Geocoding
• Finance
• Music
• Weather
• and many more.

https://t.co/EXVEgs38tq

{ 2/6 }

3. JavaScript Algorithms and Data Structures

This repository contains JavaScript based examples of many popular algorithms and data structures.

Each algorithm and data structure has its own separate README with related explanations.

{ 3/6 }

4. The Art of Command Line

Fluency on the command line is a skill often neglected or considered arcane, but it improves your flexibility and productivity. This is a selection of notes and tips on using the command line.

https://t.co/HPQmBIelNB

{ 4/6 }

5. free-for .dev

A collection of software (SaaS, PaaS, IaaS, etc.) and other offerings that have free tiers for developers.

Hope you will find it useful for your day-to-day work.

https://t.co/zoYM9wdRKj

{ 5/6 }

6. Awesome Software and Architectural Design Patterns

A curated list of software and architecture-related design patterns. A general, reusable solution to a commonly occurring problem within a given context in software design.

Hope it helps!
