Thread :

While entire world was glued with US - China face-off over Nancy Pelosi's Taiwan tour....

Bharat was silently stitching deal "MIST"!!!

Let me give you brief on it !! It's a bit technical, but read till end to get Pleasant Surprises.

Ready? Fasten Seatbelts.

(1/10)

Ministry of Environment, Forest & Climate Change RECOMMENDED MIST (Myanmar/Malaysia-India-Singapore Transit) Submarine Cable System for COASTAL REGULATION ZONE CLEARANCE. Will be 17th such Optical Fibre Cable System to land in Mumbai, expected to be ready for service in 2023

2/10

MIST is International Submarine Cable Communication Network, passing undersea to connect Bharat with Asian countries like Myanmar, Thailand, Malaysia & Singapore.

It's 8,100km-long Undersea Transnational Fibre Optic Cable system connecting Mumbai to Singapore, via Chennai.

(3/10)

MIST will provide Secure,Reliable
& Affordable Telecom Facilities in Asia.

It'll boost telecom connectivity between Bharat and Myanmar, Thailand,Malaysia & Singapore.

Project of immense importance to global communications with minimal effect on Mumbai's Coastal Environment!

4/10

Optical Fibre is backbone of Digital Infrastructure. Data is transmitted by light pulses travelling through long strands of thin fibre.

Metal wires preferred for transmission as signals travel with fewer damages.

You can imagine huge benefit to Bharat with this Project.

5/10

But is it ONLY about Cable Communication Network?

Ofcourse NOT !!!

Those who know PM Modi Ji, EAM Jaishankar Ji & NSA Ajit Doval Sir...
do know that "They" Never hit ONLY One Bird with One Stone.

So what is the 2nd Objective achieved?

(6/10)

This project "MIST" has tremendous importance from point of view of Strategic Affairs too.

It's all about "Strait of Malacca"!!!

Take a close look at Map. Bharat has safeguarded the "Shortest Route" of Chinese Navy from China to Bharat.

And this is the REAL TARGET!!

(7/10)

With Singapore, Malaysia & Thailand aboard, with their investments in project at stake..it gives Bharat Absolute Control on "Strait of Malacca".

Isn't it a Super Brownie Point?

Boost to Communication + Strategic Affairs.

Hold your breath & read ahead on future endeavours.

8/10

The upcoming Undersea Communication Cable Projects are

- Reliance Jio Infocomm's India Asia Xpress (IAX), connecting Bharat to Maldives, Singapore, Sri Lanka & Thailand.
- India Europe Xpress (IEX), connecting Bharat to Italy via Saudi Arabia & Greece.

(9/10)

- SeaMeWe-6 project, owned by a consortium of telecom providers, will connect Singapore to France via Bharat, Bangladesh, Maldives.
- Africa2 cable which will connect Bharat with UK via African countries.

This is Modiplomacy!! Liberals are needed to take care of Heartburns.

10/10
