Google is the most powerful tool in the world.

But most people don't use it right.

Here are 10 Googling tips you probably don't know:

1/ Use quotes to force an exact-match search:

"what is javascript"

2/ AND operator will return only results related to both terms:

html AND css

html AND css

HTML/CSS

HTML (the Hypertext Markup Language) and **CSS** (Cascading Style Sheets) are two of the core technologies for building Web pages. **HTML** provides the structure of the page, **CSS** the (visual and aural) layout, for a variety of devices.
