History of GDP (PPP)

from 1 AD to 1000 AD India was richest country of the world.
Then Islamic terrorists came in India and China became first.
Again in 1600 rule of British East India company India became first country.

Then British rule and its money drain policy made India worst and soon India became down.
In 1950 India was on 9th Rank and this position remained till 1975

In 2000 during Atal era India did good growth and India reached at third position And In 2000 Ind GDP(PPP) INDIA became 5 trillion dollar economy.

From 2000 to 2011 during UPA era

India gained only 1 trillion \$ and GDP was 6 trillion US \$

In 2014 when Modi came India was 7 trillion dollar GDP

Now In 2022 India is becoming 12 trillion dollar GDP.

Simply UPA from 2005- 2014 performed very bad else we could have achieved 18 trillion US \$ GDP if we have the same growth as during ABV time.
