"How to Learn Trading 10X Faster"

read this thread ■

If you learn anything from it pls share it as much as possible ■

1. Accept & Analysis What you know how much you know about it

I saw people directly jump into trading without knowing about Risk management, Position Sizing & Drawdown

First accept that if you don't know about it then drop your ego and start learning it

Give some time for it

2. Get A Mentor

■ Who can help you to right sets of rules of trading setups

■ Who can help you to develop the right mindset & psychology of trading

■ Who can give you support while you are face drawdown phase

3. Give yourself a deadline otherwise you will waste your time a lot

■ Trading is big world 100 types of Price actions Patterns, 100 Types diff indicators & Diff parameters

You don't need to learn everything you need to learn specific things which help you to grow as a trader

4. Slow Progress is better than No Progress

Consistency matters everywhere in learning also

■ $0+0+0+1+0+1+0+1 = 3$

■ $0.2+0.3+0.1+0.7+1+0.4+1+0.5 = 4.2$

5. Keep the Realistic Expectations & Target

Don't try to make 10-20% Monthly Returns 4-5% returns is enough if we consistently making it

So keep the right expectations always
