10 open source indicators & strategies.

Coded by traders & investors from around the world.

You have to try these ■■■

The Risk-Reward Trading Framework

This script showcases Risk & Reward concepts by providing the most popular components of position tracking, backtesting, and useful info about your own risk management.

Coded by carnagecain: https://t.co/MGK4gvcejr

The Breakout Probability Script

Calculate the probability of a new high or low and display it as a level perfectly on your chart.

Coded by Zeiierman: https://t.co/UBxFr4SRMJ

Chart VWAP!

This indicator displays a ■Volume-Weighted Average Price anchored to the leftmost visible bar of the chart. It dynamically recalculates when the chart's visible bars change as you scroll or zoom.

Coded by us ■ https://t.co/top30WTlC9

Multiple Frequency Volatility Correlation

This indicator provides insight into the correlation between volume and price volatility.

Coded by RicardoSantos: https://t.co/CEe8kT9Y4k

The Andean Oscillator

The indicator aims to measure the degree of variations between individual uptrends and downtrends, highlighting the amplitude of a current trend.

Coded by alexgrover: https://t.co/WiI9eB9AEV

The Bjorgum Double Tap

This script is a pattern recognition system aimed at detecting Double Tops and Double Bottoms.

Coded by bjorgum: https://t.co/FRVcznsrRA

Relative Bandwidth Filter

This script tries to identify the area of low and high volatility based on comparison between Bandwidth of higher length and ATR of lower length.

Coded by HeWhoMustNotBeNamed https://t.co/ylWTuSLJsG

Fourier Extrapolator of Price

This indicator uses the Quinn-Fernandes algorithm to find harmonic frequencies.

Coded by loxx: https://t.co/qqMpCFx1k8

Ichimoku Kink■ hy■ ■■■■

More features added to the work of Goichi Hosoda. This script offers an advanced number of options for seasoned traders, but also beginners with the ability to simplify Ichimoku.

Coded by RickSimpson: https://t.co/sRRlo4Qnso

Point of Control V2

This script now exists as both a library and indicator. It adds more tools to Point of Control making it customizable for all traders.

Coded by JohnBaron: https://t.co/sQRrRK9mt3
