Twitter Thread by The Chartians

The Chartians
@chartians

I've went from knowing nothing about Trading to currently mentoring 400+ people!

30,000+ hours of experience summed up in 30 lessons.

A thread■

1/
The amount of time you spend in the market trading/investing will always give you more insights than reading 100s of books

2/
If you treat markets as a sole income generator, your chances of underperformance due to compulsion of income generation will always be higher !

3/
4-5% a month is always better than chasing unlimited downside risk strategies that promise you 40-50%

4/
Your chances of making money in a stock sitting near 52wk high will always be more than a stock sitting at 52wk low

5/
It is not about the % move in a stock but about the size of portfolio with same risk

6/
Trades can be copied, risk management cant !

7/
The more you fear about losing money the more likely you are to lose it

8/
As a trader your responsibility is to manage risk. The reward part is with the market.

10/
Always take a trade with a fresh mentality to manage your risk and not to recover your losses.

11/
The holy grail in momentum is 200DMA

12/
One wrongly managed trade can take away your gains of past well managed trades

13/
4% a month for the next 18 months doubles your money !

14/
The more you are with the trend the more likely you will be rewarded

15/
Only a liar and god can help you catch tops and bottoms, if you managed to catch one you could be lucky

16/
Every good trader is always a bad trader who learned to manage risk over the time

17/
If you think you are the greatest trader, you are less likely to be a not. Market is the greatest trader who trades experience with money and money with time

18/
A successful trader should neither be sad nor be happy on a winning or a losing trade

19/
As a trader regular homework to scan stocks can take you places than any software can ever

20/
Far more money is lost in anticipation than in actual trading

21/
Your chances to make money from #tataelxsi at 10,000 will be always more than #yesbank at 15

22/
Don’t try to find the next multi bagger, try to find the next mover where your bag is heavy !

23/
200ma is also called as the mother of all averages

24/
Chase momentum not sentiment

25/
No software can give the results of stock scanning manually

26/
The most difficult part of a trade is to wait

27/
As a trader the most under rated thing is exit in a trade rather than entry

28/
Following one system 100 times will give you more money than following 100 systems 1 time

29/
Don’t try to catch every move, rather try to catch a move that everyone didn’t !

30/
You your self are the only multi bagger!

Trade well and Cheers ! ■
