15 Unwritten rules that'll help you connect 100% with your friends.

1. Keep it 100% with your friends. Tell it as it is or keep it.
2. No matter what dilemma you're presented with, never snitch on your friends.
3. Avoid any relation with your friend's partner.
4. There's no debt between friends.
5. Sharing is caring but you can share just enough with anyone.
6. You can't expect your friends to help with everything. Have something you can fix.
7. Make friends with people who own assets. Broke friends betray easy.
8. Avoid friends telling others about your relationship. They can't keep a secret.
9. Most people aren't your friends. They're after what you can offer.
10. Never try to fix a broken friendship. History has a tendency of repeating itself.
11. Never attempt to control your friends. People do what they want.
12. Your friends are not that agreeable. They agree with what's serving them. (It's not about you)
13. Almost all your friends will become enemies if you're better than them.
14. Avoid friendships that start too fast and easy. They end just as fast.

15. Your relationships are your greatest financial investments. Make wrong choices and suffer all your life.

It's Sunday, howdy?
