Trading is about mastering ONE setup

And I'm giving you the one that turned me into a profitable trader FREE...

Take 2 mins out of your day to learn my EXACT setup:■

This setup involves a few elements but is mainly comprised of the idea "change in trend"

I'm simply waiting for confirmation of a trend change and then taking advantage of it

Here's the breakdown:

First, I need to identify trend.

This step is simple. Is price making higher highs? Higher lows?

Once trend is established, I wait to see a CHANGE IN TREND

For example, in a downtrend I may see a higher high form.

That's the first sign of a change in trend

Price was able to break the structure of the previous higher low.

Indicating the first sign of a trend change.

If you don't know how to identify a break of structure, read this (after finishing this thread)■

<https://t.co/RMOhX13zci>

Adding market structure to your trading could literally turn you into a \$10k/month trader

But learning what a real structure break is can take months...

So here's a thread on how to identify a break of structure:\U0001f447 pic.twitter.com/4J1ywQK1FO

Now that price has seen a higher high, we can assume trend is going to change to the upside

Meaning we should see a lower high

That's when we want to look to buy

But where do I buy?■■■

There are 2 things I look for when determining where to buy:

1. Retracement
2. Supply/Demand

For retracements, I simply draw a fib from the low to the higher high that was formed

All I want to be buying is anywhere below the 50% retracement

Anything above, I don't buy

Then, I'll look for a supply/demand zone to enter (that's below the 50% retrace)

This helps determine my stop loss and entry

If you don't know supply/demand, read here (after this thread of course)

<https://t.co/hAnSMxFnJy>

I lost \$15k over 2 years until I found this one strategy...

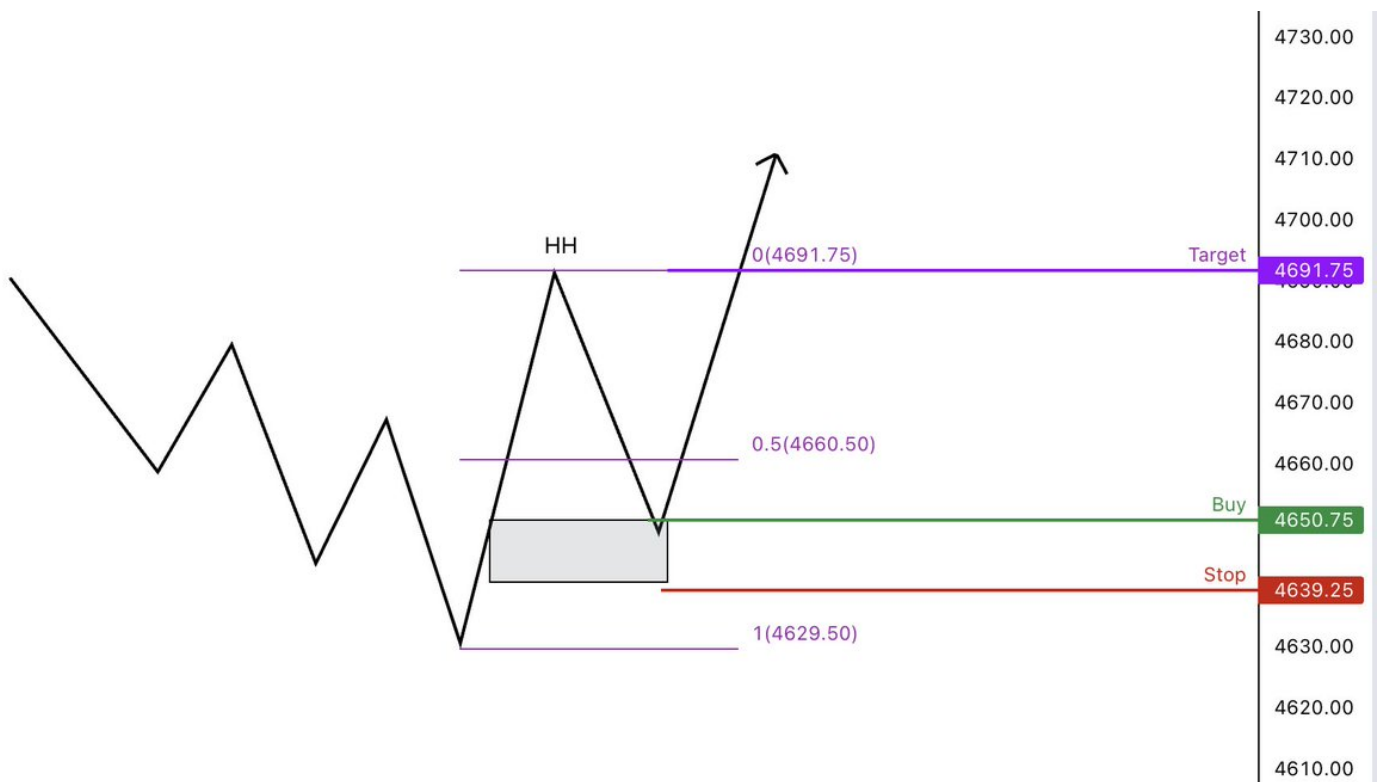

that I've been using consistently for the past 3 years as a full-time trader

And I'm giving it to you for free:

— Jordan F\u2503Stock Trader (@FT__Trading) June 14, 2022

After entering, I'll put in my stop and use the higher high as my first target

That's about it!

There's a few other elements/concepts that I look at in my full strategy...

but that's for another thread■
