my girlfriend cheated on me with my brother while on vacation

Here are 5 trading strategies that could make you \$100k this year:■

1. Supply/Demand

If you haven't heard of supply/demand and you follow me... I don't know what to tell you

Here's a thread going over what supply/demand is■

<https://t.co/EVPzejlng4>

I lost \$15k over 2 years until I found this one strategy...

that I've been using consistently for the past 3 years as a full-time trader

And I'm giving it to you for free:

2. Balance Theory

Balance theory is about understanding consolidation vs expansion

It helps you determine which areas price is looking to go (and where price will reverse)

Here's a thread on it:

Balance Theory is LITERALLY how stocks move

It can be used in all types of trading

Here's a breakdown of what it is and how I made close to \$2,000 using it pic.twitter.com/Rsfm0Mxy3w

3. Short Squeezes

Although \$GME and \$AMC get a bad rep, you can still learn a lot from their price action

Short squeezes happen all the time and if you learn how they work...

You can make a butt load

Here's a thread on how to identify and trade a short squeeze

I made over 2,000% using a simple short squeeze setup

And I'm giving it to you for free

4. Market Structure

Learning how to identify market structure is crucial to stock trading

If you know who is in control, you can add another layer of confirmation to your trade

Here's a thread on market structure

<https://t.co/sXCdzeNhvV>

Adding market structure to your trading could literally turn you into a \$10k/month trader

But learning what a real structure break is can take months...

5. Trading institutional levels

Scalping levels on your charts can come in handy if you're looking to simplify your trading

or if you're looking to find important breakout/reversal points

Here's a thread on levels:

I turned \$2,781 into \$10,000 in 30 days

And I'm showing you exactly how I did it:\U0001f9f5
