If you are spending Rs 40-50k on research related to Trading/investing.

Hold on, these 7 tools/websites are absolutely free ::

A thread ■

1/ [@tradingview](#) :

TradingView is the best platform for doing chart analysis. Mobile app and software are also available which a user can use. There are thousands of indicators and tools available for free.

<https://t.co/9Aj8VgrcYo>

2/ Chartink Screener:

It is the best screener that is available to scan and filter stocks out of 1000+ stocks. There are free screeners available and you can create your customized screener.

They also have a dashboard where you can add multiple screeners.

<https://t.co/zpUihf1XGj>

3/ Opstra:

This is a good platform especially for futures and options traders. They can analyze payoff of their position, probability of winning, max profit and max loss.

<https://t.co/CStrigcz2c>

4/ [@screener_in](#) :

Screener is one of the best platform to filter out stocks based on the various fundamental parameters. Investors shouldn't miss this and as it will help them in analyzing stocks.

<https://t.co/zNaWxNRUK4>

5/ [@TickertapeIN](#)

Again it is a screener and it also helps in filtering good fundamental stocks based on the fundamental parameters. Also, it has a screener based on mutual funds apart from stocks.

<https://t.co/K10UvAf3CO>

6/ [@finologyticker](#):

Finology Ticker is a screener plus it gives a good graphical representation of the fundamentals of the companies.
