Most people have only just scratched the surface of the internet.

But beneath the shallow waters there's pure gold.

Here are 10 of the most useful websites in existence:

Not a traditional search

Use this demo as a creativity tool to explore ideas and discover books by getting quotes that respond to your queries.

Use natural language

Speaking to it in sentences will often get better results than keywords. That's because the AI is trained on human conversations.

Play with it

Try our sample queries then try your own. Experiment with different wording to see how it changes the results.
