Thread on INDICATOR DUPLICATION

We usually try our hands with some of the well known indicators to see if they have an edge.

But the fact is that most indicators are based of the humble...you guessed it.. MA

Lets see this with famous ones : RSI, Wil %R, CCI, PSAR, MOM, ROC

RSI, William %R 50 level crosses coincide with 14 MA crossovers

CCI, Momemtum crosses coincide with 14 MA crossovers

PSAR, ROC crosses coincide with 14 MA
