6/n

Bid x Ask Order Flow Chart

This order flow chart type splits the total volume into the seller and buyer side. It illustrates the volume traded on each side a certain price level.

7/n

The bid x ask order flow provides overview of how the volume is traded at a certain price and whether it has been traded more on the buyer or seller side. Helps in identifying a change in momentum, market pressure and order absorption

8/n

Each bar brick is color coded based on Delta.

Delta = Buy Volume - Sell Volume

Green = + Delta (Buy Volume > Sell Volume) RED = - Delta (Buy Volume < Sell Volume)

9/n

Another popular variation is where the sellers are on the left side of the candle and buyers on the right side

10/n

Delta Order Flow Chart

Chart illustrates difference between buy and sell market orders. Delta is shown in +ve or -ve. +ve delta illustrates there are were more aggressive buyers active and, in contrast, a -ve delta illustrates more aggressive sellers were active.

11/n

Delta order flow chart type provides an opportunity to measure the aggressive buying and selling pressure at a price level and indicates which side is more aggressive - buyers or sellers.

Popular Order Flow Chart Combinations

Order flow charts can also be combined in various ways to have multiple order flow information in one chart.

■Bid x Ask Order Flow + Volume Combo

Bid x Ask Order Flow + Profile Combo

Bid x Ask Order Flow + Delta etc.
