I run a $200K/year one-person online business.

Here are 7 useful no-code tools:

1/ Znaplink

@znaplink gives you a beautiful bio link website to add to your social media profile.

It's great for sharing links to your top products, new content and your social links.

2/ Gumroad

@gumroad is the easiest way to sell digital products.

Anyone can create a free account and start selling online even without a website or domain.

3/ Notion

@NotionHQ is an all-in-one organizer for work & life.

You can create a custom digital workspace for projects, note-taking, swipe files, content calendar, CRM, and more.,

4/ Typedream

@typedreamHQ is the fastest website builder I've ever tried.

You don't need any background in coding or design to build beautiful websites for your product or startup.

5/ Tango

@Tango_HQ is a time-saver for documentation and walkthroughs.

It automatically create beautiful screenshots as you execute the process or perform a demo.

6/ Capcut

@capcutapp makes video editing accesible to all.

It is a free powerful video editor for editing YouTube videos or short form content for TikTok and Instagram.

7/ Tweethunter

@TweetHunterIO is your tool for publishing on Twitter.

It does everything from providing tweet analytics, tweet inspiration, AI writer, CRM and more.

That's it!
