Five FREE courses to learn Python and get started with building real-world projects.

(A thread) ■■

1. Learn Python for Beginners

This course by freeCodeCamp will give you a full introduction into all of the core concepts in python.

■ https://t.co/l6TTMSfdZx

2. Google's Python Class

This course is for people who have some experience in programming, enough to know basic jargon. It includes written material, video lectures and exercises to practice Python coding.

■ https://t.co/JsCXMI1Hqn

3. Python for Programmers

This course includes both fundamental concepts as well as Python programming language. It covers basics like Python syntax, control flow, functions, and the concept of OOPS.

■ https://t.co/pvMU93pqJP

4. Learn Python 3 from Scratch

The course begins by exploring the basic building blocks before moving on to higher-level concepts such as functions and loops. Fun quizzes and coding challenges will accompany you along the way.

■ https://t.co/iBpwOgof7f

5. The Python Tutorial

What would be better than learning the language from the developers themselves. This tutorial aims at giving you a good flavour and style of the language along with its most noteworthy features.

■
