World Famous
■Inside Candle Trading Strategy■
If You want to be a Successful Trader,
It will helps you a lot.

Works really good on a Trending Market,
So U will never miss a Trend.

As the name suggest,
A Candle should be formed between the previous Candle body.

A Small ■

Strategy:
Market Moves in Pattern,
Like:
Higher High & Higher Low
Lower Low & Lower High.

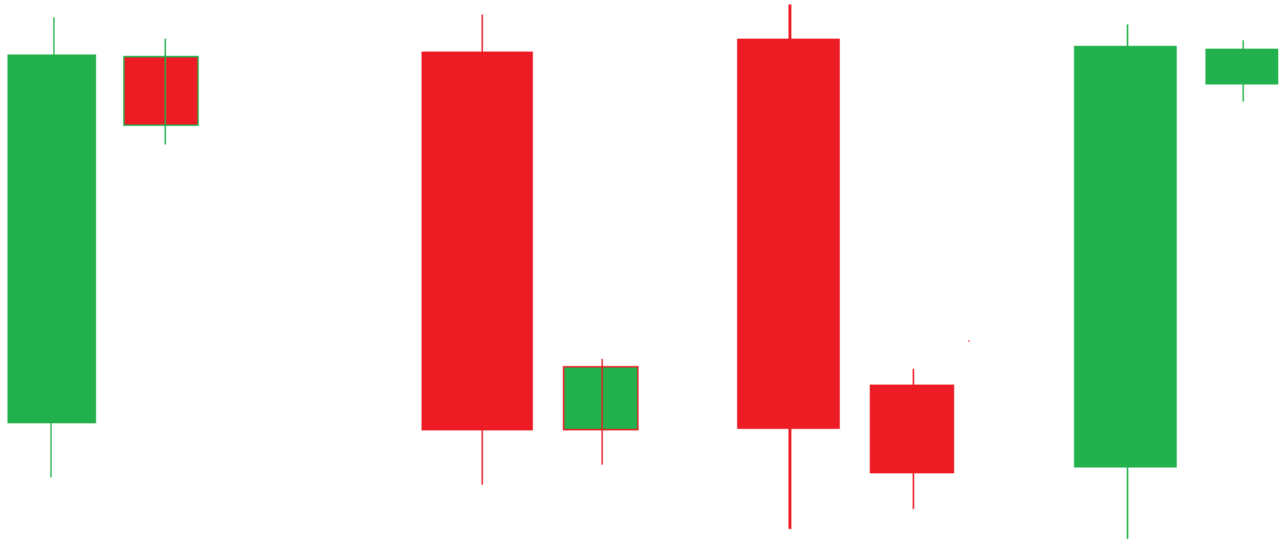

Market Not moves all times in a Particular Direction.
Market Takes Pause,
move again,
again take Pause,
Again Moves.

We are going to trade with this pause,
in this strategy.

Whenever Market Falls or Rallied
With big move,
after that a pause candle generally occurs,

like this.
After that market generally continue with trend.

So, We are following Trend & Price Action
But Candlestick wise.

Try to Find combination of Two Candle Like below Picture:

TF:15 Min & Higher.
No.1 Candle-Mother
No.2 Candle-Baby.

Whenever this type of situation occurs it is called Inside Candle.
Large Candle or Small Candle Doesn't Matter
Baby Candle should be inside mother's candle body.

Long Position:
After This formation happened
Look whether the 3rd Candle is breaking the 2nd Candle High or not??

If it breaks then

Buy half qty at 2nd candle high
Buy half qty at 1st candle high

Your SL would be 2nd Candle Low.
Target = Body of the 1st Candle.

Short Position:
After this formation happened
Look whether the 3rd candle is breaking the 2nd Candle low or not??

If it breaks then
Sell half qty at 2nd Candle low
Sell half qty at 1st Candle low

Your SL would be 2nd Candle High
Target= Body of the 1st Candle.

I have made a detailed video about this strategy,
Take a look:
