### 6 Exercises that will transform your chest:

= Thread =

A strong chest plays a vital role in physical performance and health!

A strong and muscular chest benefits you by:

- Lifting heavier
- Strengthening and supporting your back
- Improving posture
- Improving movement
- Enables deeper breathing
- Looking good
- Being jacked

## 1. Decline Bench Press

A great exercise to start your workouts, especially if you experience shoulder pain:

- Increased Activation of Lower Pecs.
- Increase Tricep Activation
- Reduced Stress on Back
- Reduced Stress on Shoulders
- Lift More Weight
- Build a thick chest!

## 2. Incline Dumbbell Press

Designed to build chest strength and size, so is included in most well-rounded chest workouts:

- Works chest & delts through a long range of motion in a stable position
- Builds your upper chest
- Prevent muscle imbalance
- Look sick in a singlet!

### 3. Dips

Another forgotten old-school chest builder!

- Can do body weight or add weights
- Works entire upper-body
- Engages core
- Increase flexibility
- Reduce injuries
- High range of motion and muscle stretch
- The Rock does them

\*lean forward to focus more on the chest

#### 4. Machine Chest Press

A compound exercise to do near the end of a workout

- Develops chest, deltoids, and triceps
- Works your serratus anterior and biceps
- Builds upper body strength and power
- Improves movement efficiency
- Good for beginners still developing stabilisers

#### 5. Flat Dumbbell Fly

The dumbbell chest fly can help open up your chest muscles

- Increased Strength
- Increase Range of Motion
- Increased Shoulder Strength
- Better Core Stability
- Increased Core Strength
- Improved Muscular Balance
- Decrease Back Pain

#### 6. Pec Deck/Pec Fly Machine

The pec deck is an excellent option to increase your chest muscle hypertrophy

- Strengthens your torso and stabilizes shoulder blades
- Strengthens supporting muscles, like the serratus anterior
- Opens up and strengthens the backs of your shoulders

Are you ready to take your chest to the next level?

Put these all together and give this workout a try!

Add reps and weight each week for progressive overload!

Exercise	Sets	Repetitions	Rest
1. Decline Bench Press	5	8-12	90 seconds
2. Incline Dumbbell Bench Press	4	8-12	90 seconds
3. Dips	4	12	90 seconds
4. Machine Bench Press	3	12	90 seconds
5. Dumbbell Fly	4	8-10	60 seconds
6. Pec Deck/Machine Fly	3	8-12	60 seconds
