2 books which have immensely helped me in #derivatives

Mind over markets- James Dalton
Option volatility &Pricing- Sheldon Natenberg

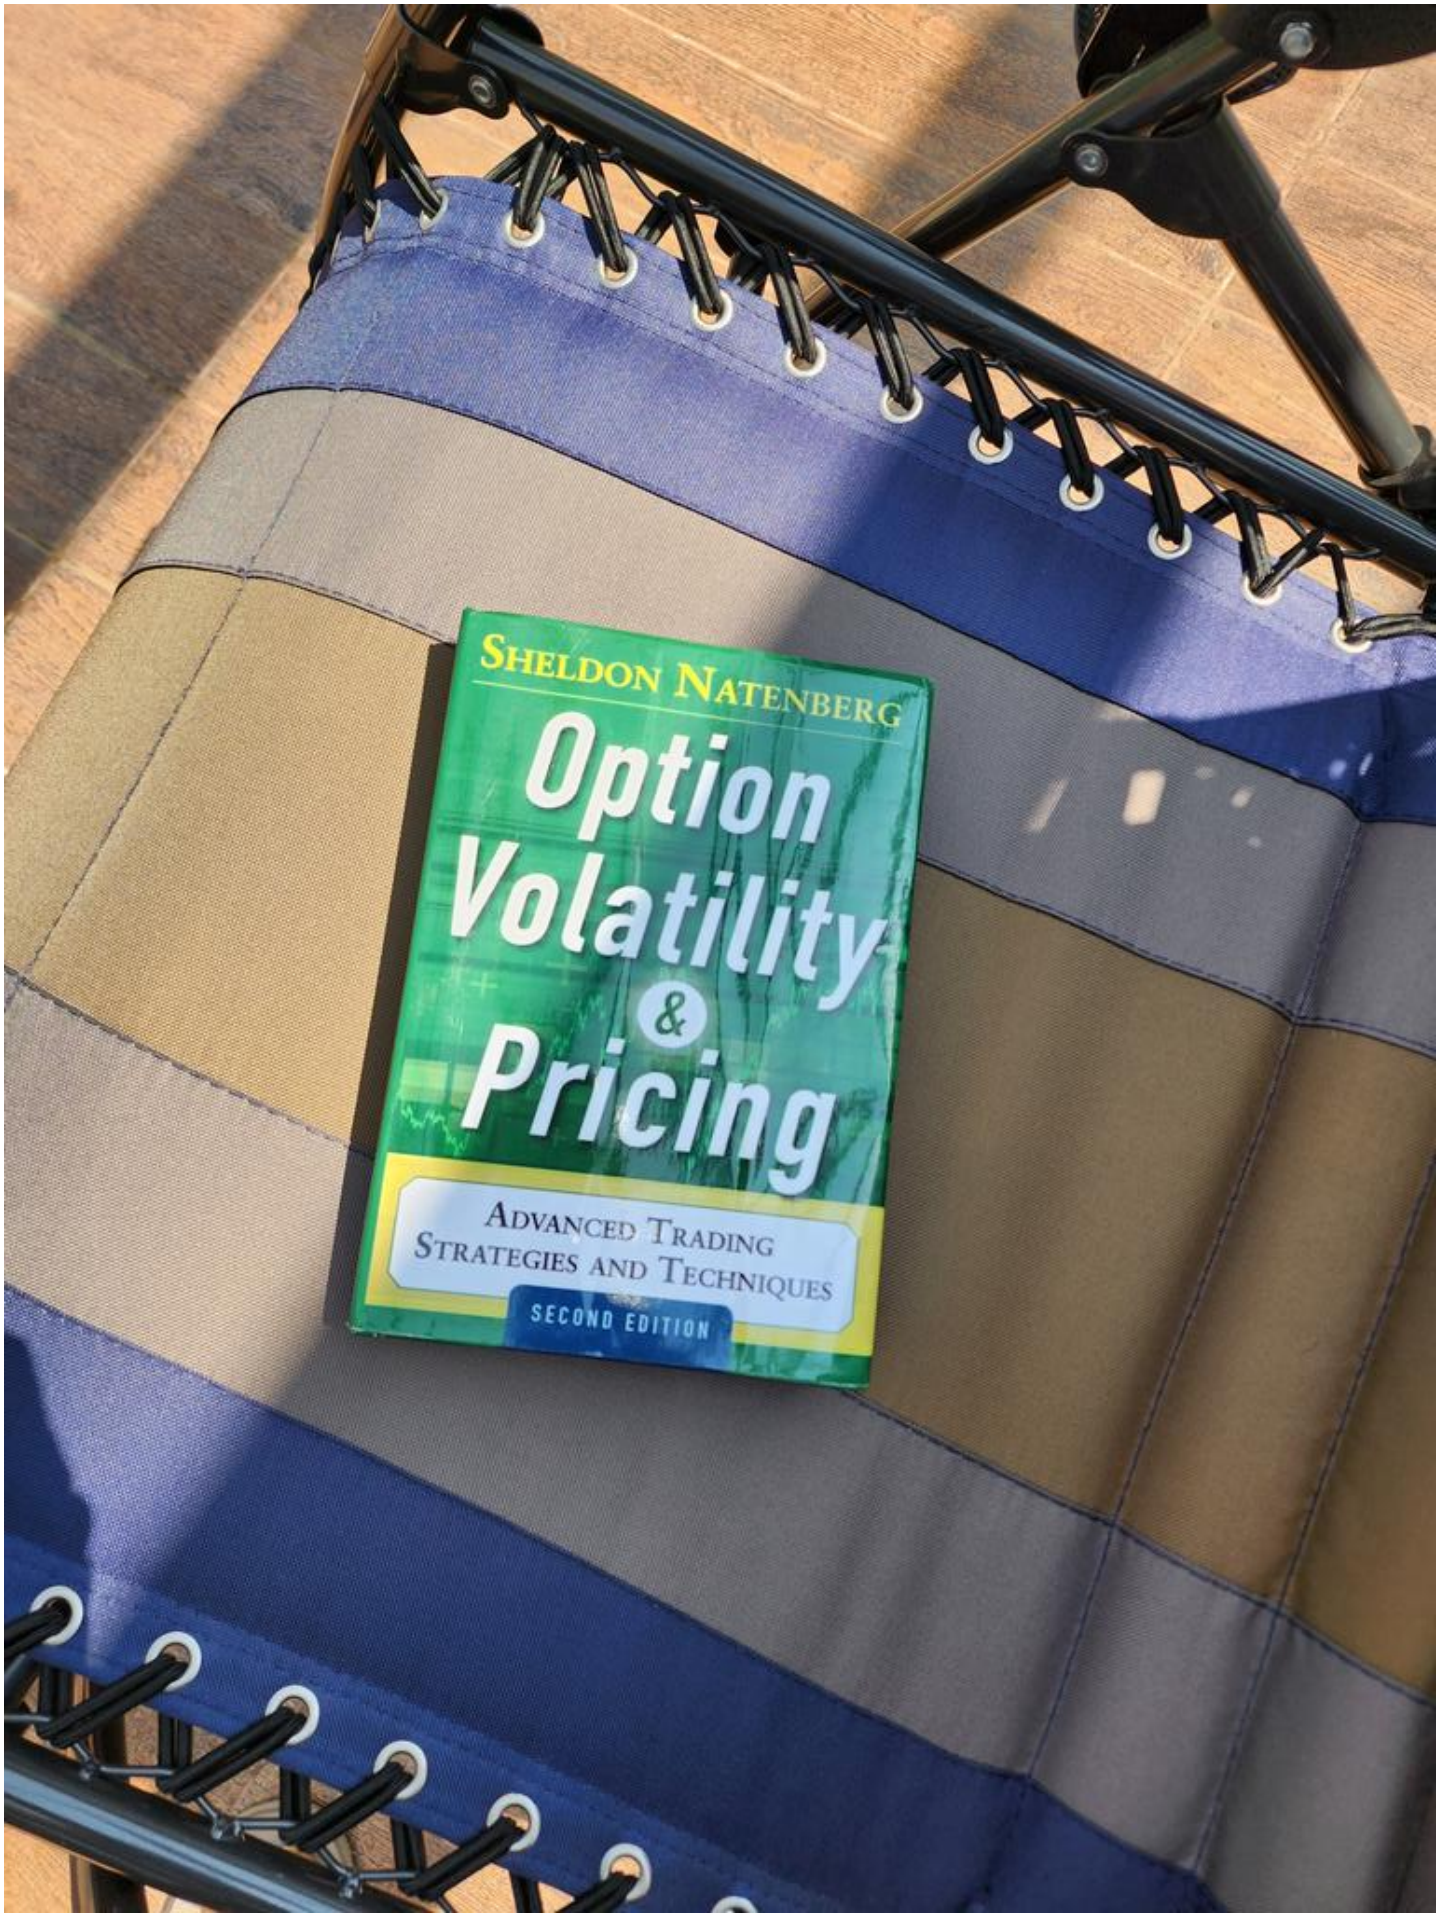

I recommend reading both at least 2 times.

It is 1 of the reasons I'm 15 years in markets actively trading till today

It will help you also

Purchase a hard copy guys and keep it for constant referring. Read and re read. This is me in the morning today.

If you get into that soft copy/pirated shit for a few hundred rupees and expect the markets to make you lakhs, you will instead have money taken from you.
