Apple Mac apps are the most powerful productivity tools on earth.

Use them properly and they'll save you hours, days, even weeks.

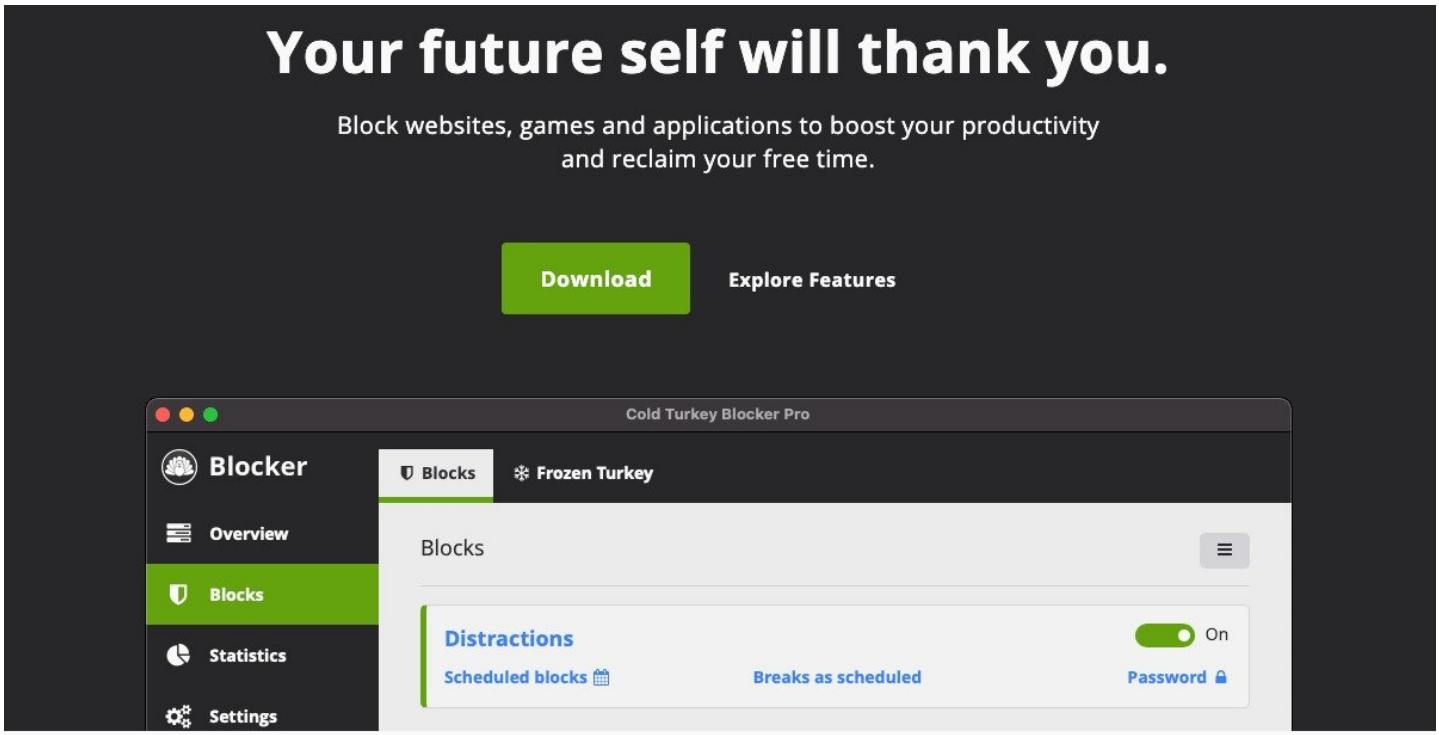

Here are 10 of the most useful Mac apps in existence:

Cold Turkey

Cold Turkey is the most versatile website and application blocker for Mac's.

It's got advanced scheduling features, clever barriers to unblocking sites, and doesn't collect any of your data.

CheatSheet

CheatSheet helps you memorize keyboard shortcuts for all your favourite Mac apps.

Just hold the Command Key for a few seconds and you'll get a list of every shortcut available in that app.

Meeter

Join Zoom, Google Meet, or other virtual conference meetings faster with Meeter.

Meeter automatically pulls your upcoming calls and puts them in your menu bar, letting you manage them all in one place.

Fantastical — Calendar

Fantastical is the best calendar available for Mac.

It’s got everything you’d expect from a modern calendar app and a little bit extra, including Time Zone sync, reminders, weather forecast, and more.

PDF Expert

The go-to PDF editor for Mac.

It’s got all the tools you need and is seamless to edit, annotate, sign and organize PDF’s.

AltTab

Switching from Windows to MacOS? Alt-tab won't work so well…

Luckily, AltTab brings the power of Window's "alt-tab" window switcher to Mac and solves this problem, helping speed up your workflow again.

Magnet

Magnet helps you organize your windows and workspace with configurable keyboard shortcuts.

Having windows where you want them eliminates app switching and significantly enhances multitasking.

Bartender 4

Bartender lets you de-clutter and take total control over your menu bar items, what’s displayed, and when.

Improve your workflow with other features like quick-reveal, search, and custom hotkeys.

Drafts

Drafts is the number one writing app for Mac—it's a quick notebook, handy editor, and writing automation tool, all in one.

You can also seamlessly sync content across all your devices for ease of access.

Amphetamine

Amphetamine lets you keep your Mac display awake through a simple on/off switch, or automatically through easy-to-configure Triggers.

Perfect for downloads or when watching videos.
