Twitter Thread by Nagato ■

Nagato ■
@CryptoNagato

I spent tens of hours researching these Crypto projects.

This thread is the result of all that hard work.

Here's my ultimate bear market accumulation list:

No shitcoins.
No bullshit.
No hopium.

Just a ton of projects that will shine in the next few months and years.

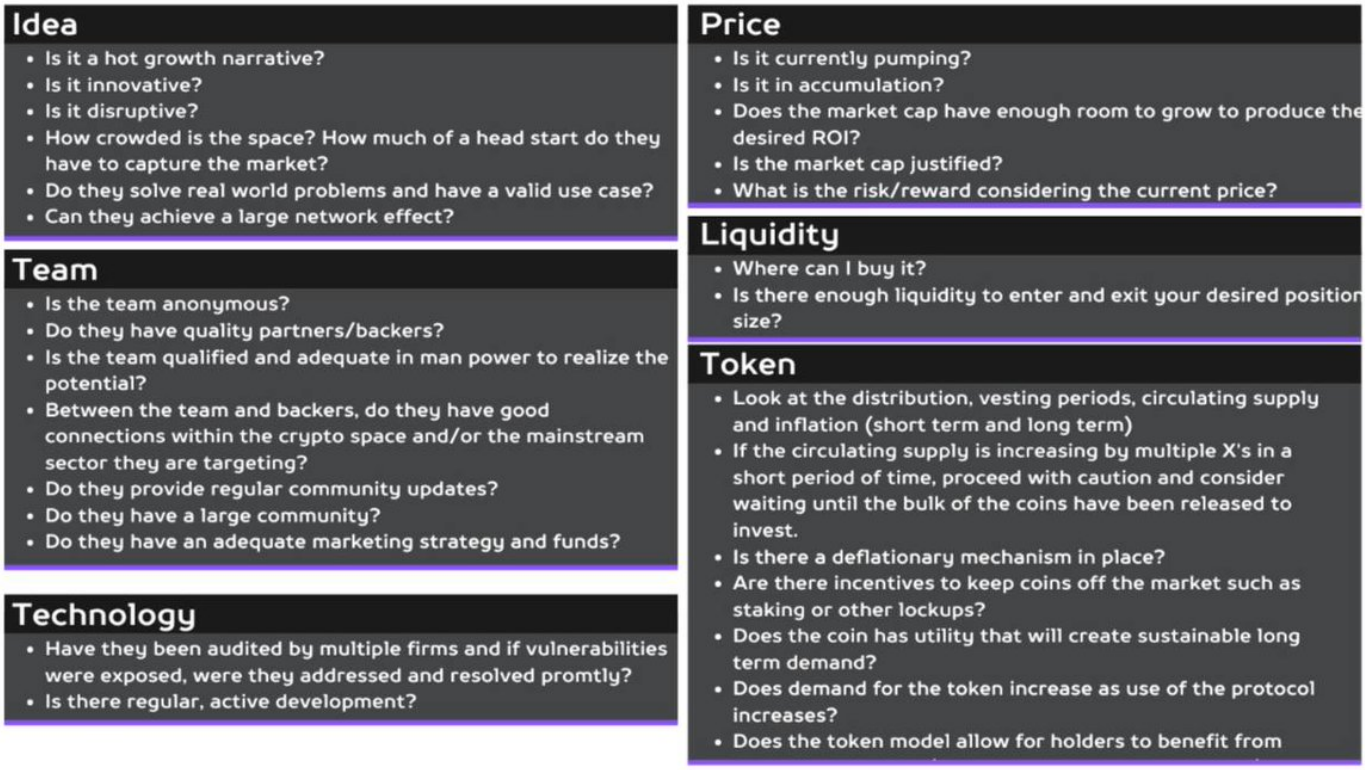

Enjoy■

But first, I want to share this picture with you.

Here you can find some of the criteria I use to decide whether a specific project could be a valuable investment.

Keep asking yourself these questions over and over again.

This market is crazy; conditions rarely stay the same.

■■ DISCLAIMER ■■

Nothing you'll see here should be taken as financial advice.

The purpose of this thread is only to show you some (in my humble opinion) solid projects.

Don't buy something just cause I mentioned it!

Make sure to DYOR and, after that, do as you please.

LAST DETAILS:

- Besides $QNT, the list goes from higher to lower market cap.

- There are a few high caps and a lot of mid/small caps cause I prefer to invest in unknown coins before the herd.
(Even though they are way more risky!■■)

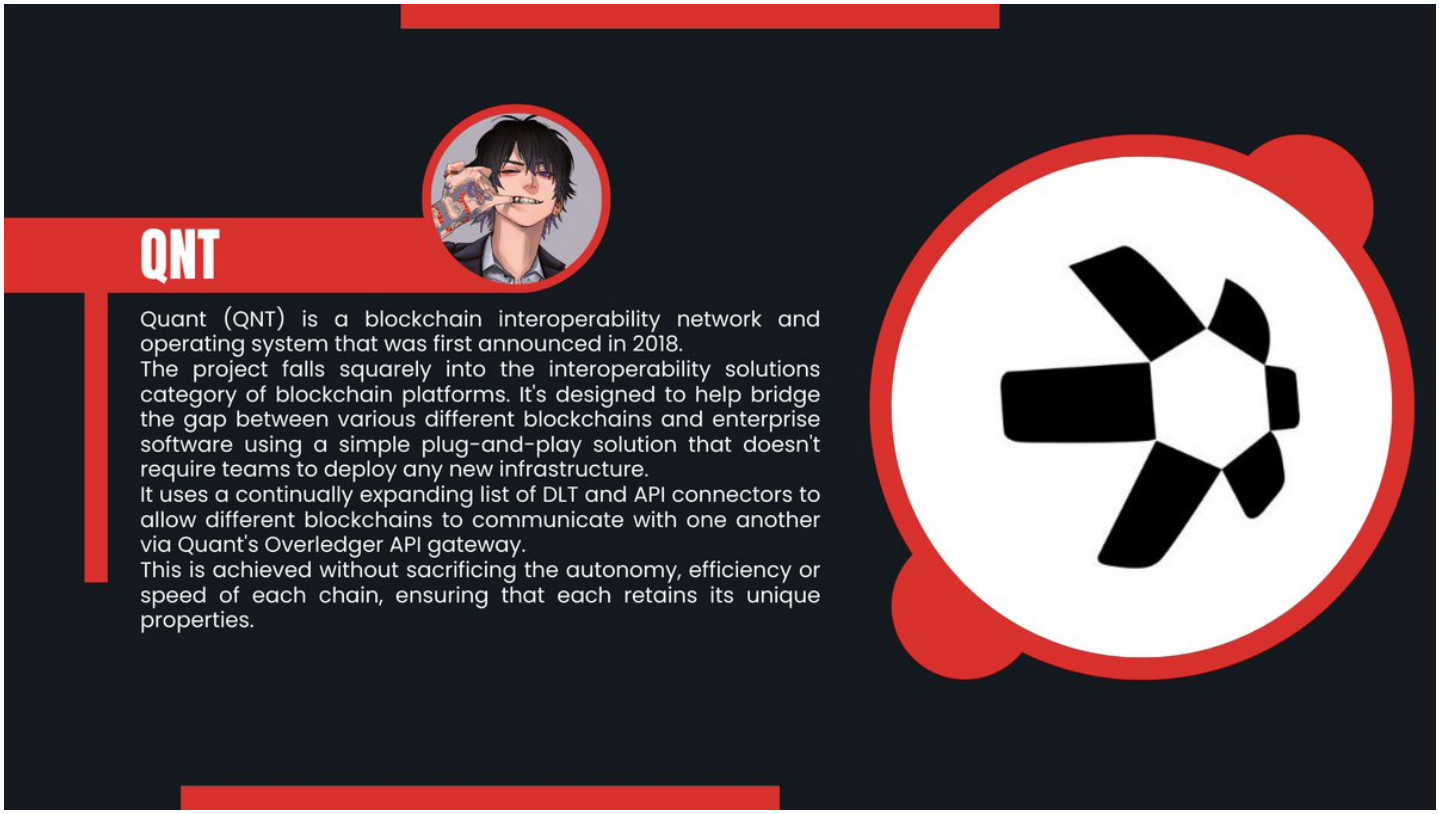

- I don't hold all these coins.

DISCLAIMER■

This list is not definitive.

- I'll keep on adding more projects if I find something interesting.

- I'll remove projects if they don't move in the direction I expect them to go.

Follow me if you don't wanna miss any updates ■ @CryptoNagato

One more thing:

"WHERE CAN I BUY THEM"?

You can find 99% of them on my favourite platforms.
Here are my referral links, in case you wanna use them♥■

@kucoincom ■ https://t.co/TKc8796PJ3

@CoinMetro ■ https://t.co/QgBoW5uQo6

@MEXC_Global ■ https://t.co/w60cU5fMLE

Thanks for reading! ♥■

If you enjoyed this list and found it helpful, please RT the first tweet, that would help me a lot!

Also, make sure to let me know if you hold some of the above mentioned coins and tell me why you're bullish on them!

DID I MISS SOMETHING? ■
