Chat GPT is the Most Powerful AI tool.

But most People don't know how to use it for their Benefit.

Here are 6 Ways to go VIRAL on YouTube by using Chat GPT:

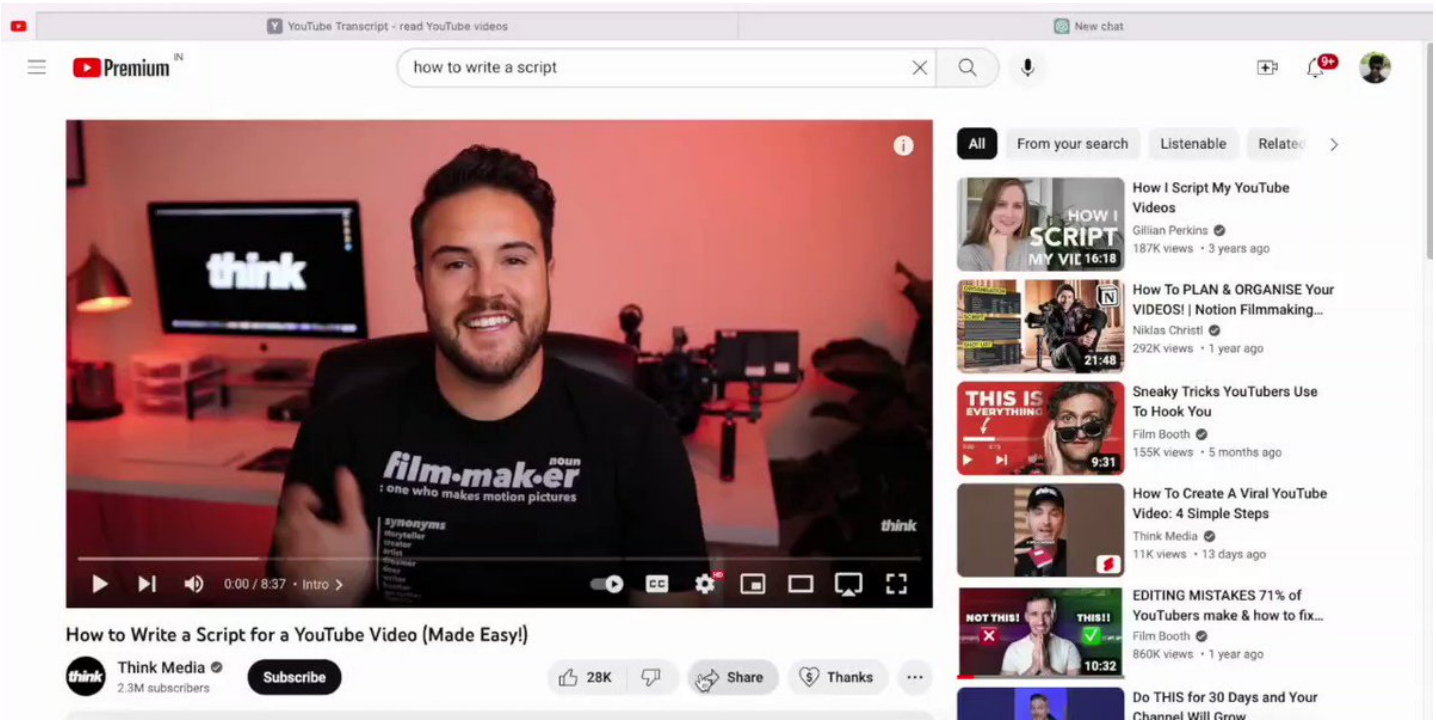

1. Remake a Video

Just pick a video you liked and visit
https://t.co/vW1jucUnRY to get its transcript.

Once done, bring that back to Chat GPT and tell it to summarize the transcript.

Read the summary and make a video on that yourself.

2. Getting Ideas

Just search the term:
Viral Video Ideas about "X"

And it'll give you a ton of ideas you can make a video on.

It can really get you Viral because,
All Chat GPT will do is tell you what people are searching for on the internet.

3. Find Competitors

You got the YouTube idea,

Now search that on the YouTube search bar to see who has already made a video about it.

Find creators that are 1 step ahead of you and analyze what video took them ahead of you.

Have a look■

4. Title

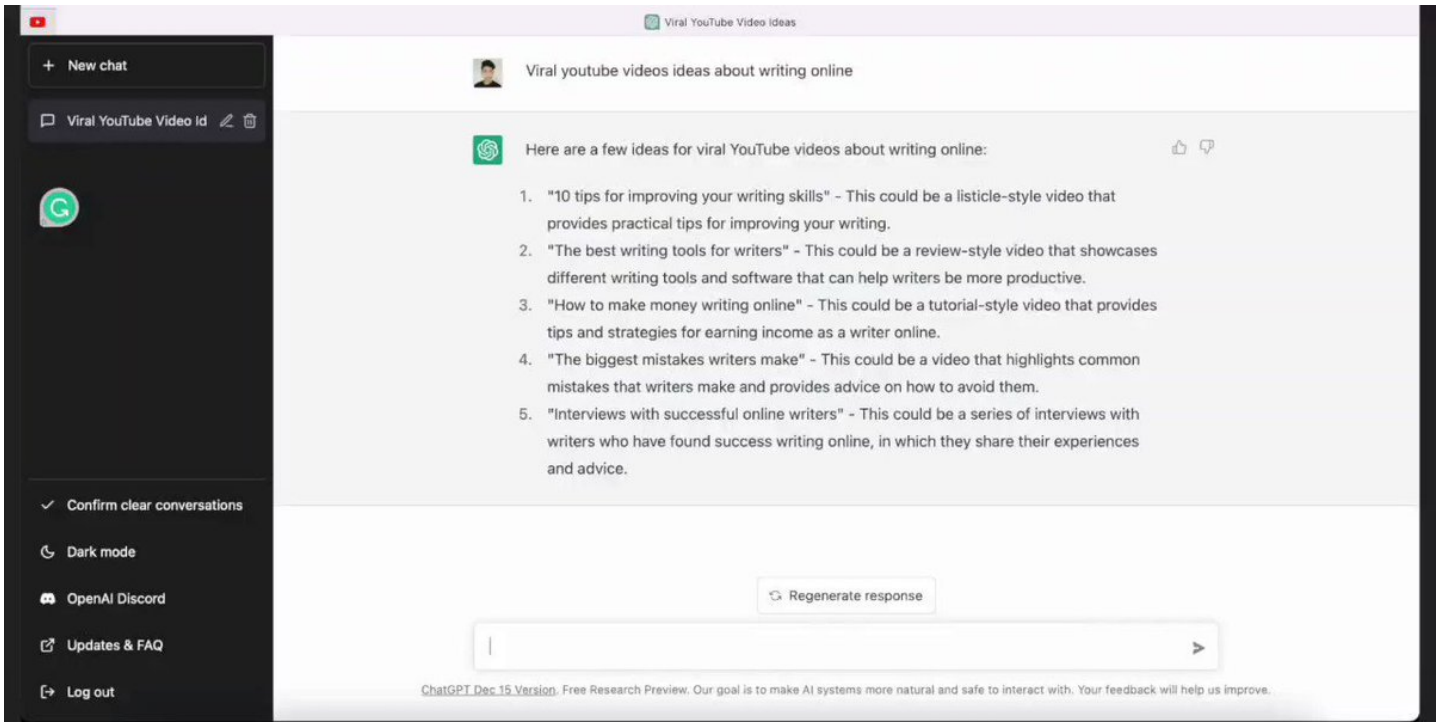

Ever spent hours writing the Perfect title?

Why not give that task to Chat GPT?

Just search:
Give me 10 YouTube titles about "idea"

It's gonna provide you with the best Title possible.

5. Script

Yeah, I know it sounds illegal, but
You can also make Chat GPT write video scripts for you.

Just Search:
Write a Viral video script about "topic"

And your video script will be ready.

(I won't suggest you to copy that entirely cause it'll take away your authenticity)

6. Refine Your Script

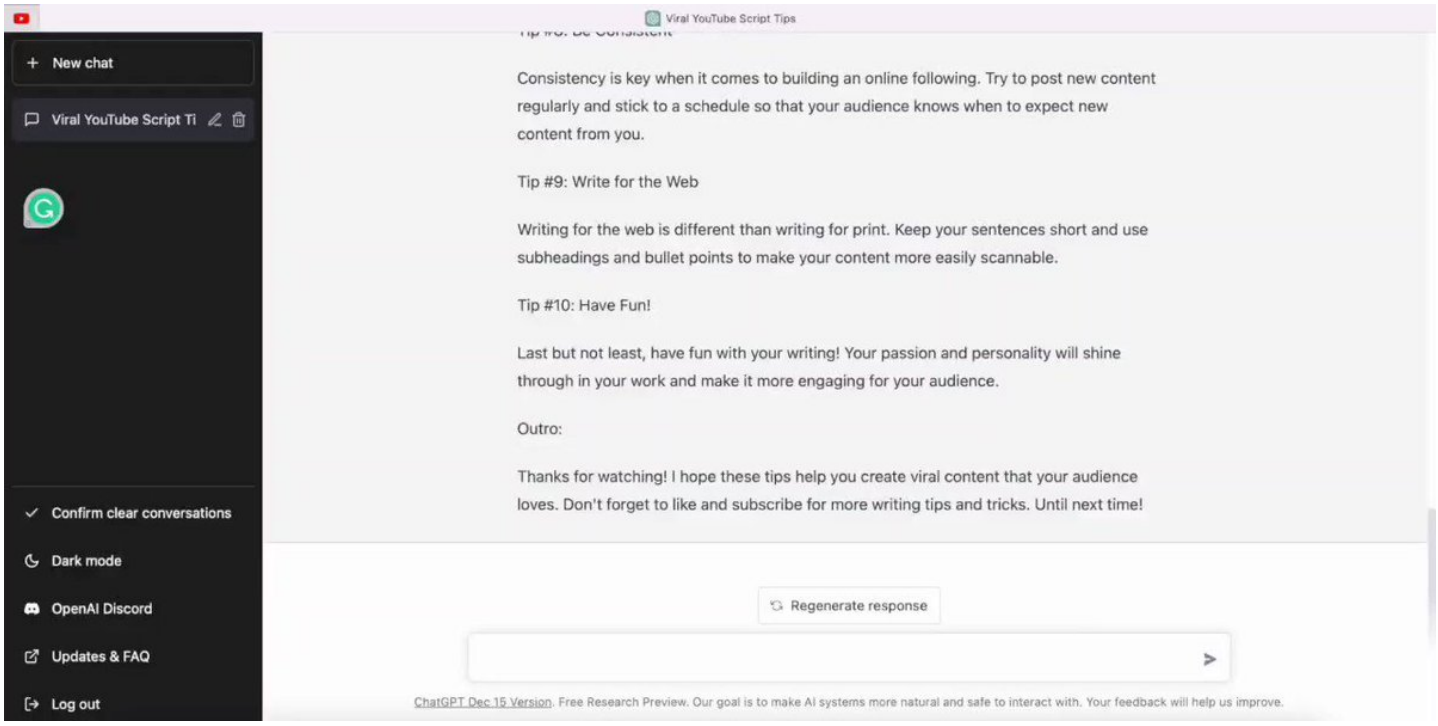

Once you've done scripting your video,

You can tell Chat GPT to make it:

• More Detailed
• Easier to Grasp
• More Informative
• More Professional

Just copy and paste your script and tell Chat GPT how you wanna make it.

Have a look■
