Bullish Engulfing Pattern

The bullish candle completely engulfs the body of the previous bearish candle.

A bullish engulfing pattern appears when a large green candle appears after a small red candle of the previous day. The body (Green candlestick) of which completely cover the body of the previous day's (Red) candlestick. (2/10)

This pattern signifies a change or a reversal in the ongoing trend of the prices of a particular security. (3/10)

Generally, the bullish engulfing candle is preceded by more red candles, representing a bearish phase in the market. In fact, the bullish engulfing candle usually represents the bottom of a downward trend in prices, after which the prices begin to show an uptrend. (4/10)

This bullish reversal pattern is found at the end of a downtrend.

When visible, this bullish pattern signals that the previous downtrend has ended and a potential reversal trend (a new uptrend) is beginning. (5/10)

This pattern is very easy to find out, but confirmation is very important before any entry.

Don't do a silly mistake like-

"Look. It's a Bullish Engulfing Pattern. This is a sign of strength, let's buy!"

Next thing you know, the market reverses and your stoploss gets hit.(6/10)

Taking Confirmation-

When you see bullish engulfing pattern in any stock, keep an eye on the next candle (Third candle)

✓Check the strength of third candle.

✓It should close above the 2nd green candle & if the volume also turns high that it can be bonus for you. (7/10)

In our example,

Third candle gives the confirmation to bullish engulfing pattern.

✓We can now take entry above the confirmation candle to ride the reversal.

✓Stoploss should be below the low of engulfing pattern. (8/10)

Target/Exit Point:

✓ I always follow next resistance level as my target.

Always mark strong resistance areas in your chart and use them as a target for a perfect exit. (9/10)
