Google Chrome has over 137,000 extensions.

But 95% of Traders are unaware of the best extensions for trading.

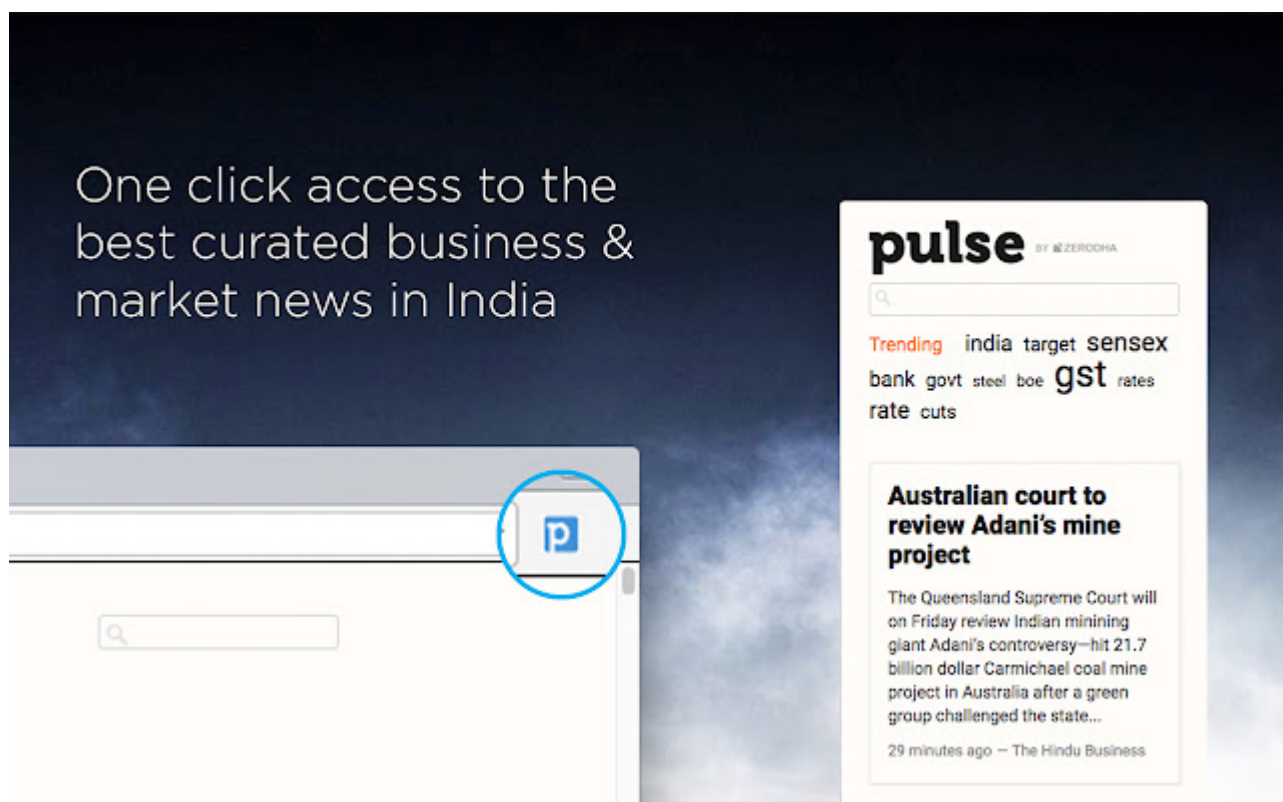

10 Google Chrome Extensions that will accelerate your trading ( all free ): ■

Collaborated with @niki\_poojary

1. Pulse by Zerodha

Latest financial and market news from all major Indian news sources are aggregated in one place.

■ <https://t.co/jQ5Lu1P1r3>

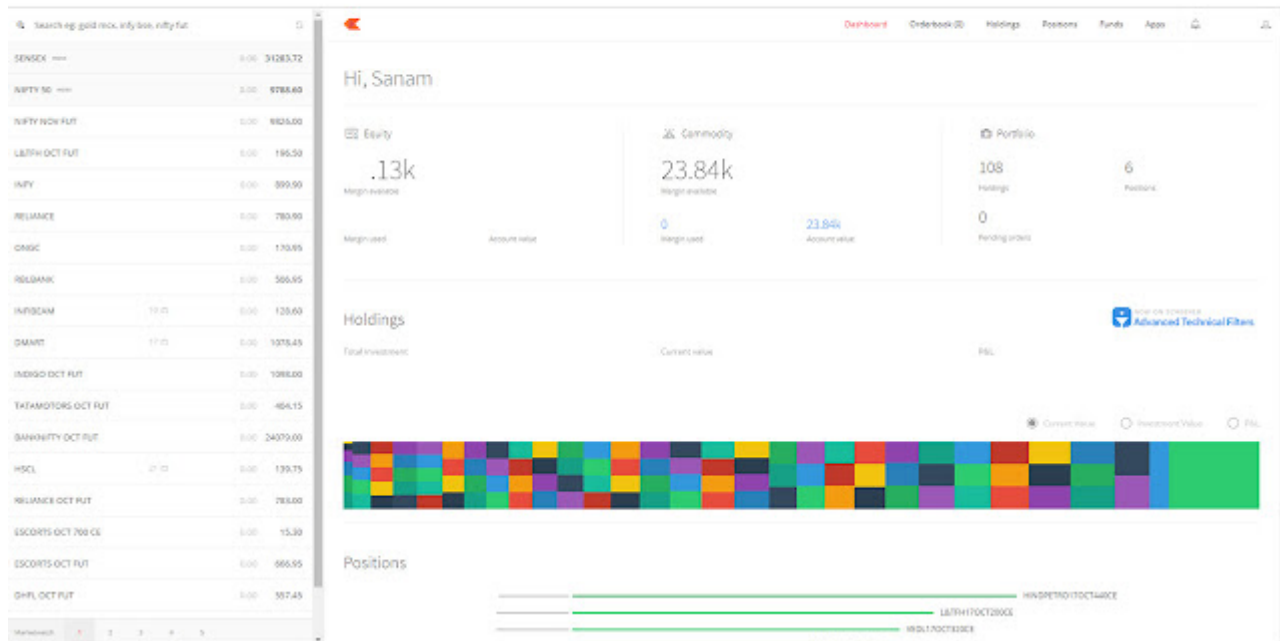

## 2. Full Width Zerodha Kite Trading Platform

This extension will make your Zerodha kite trading app full-width for large-screen desktops and laptops.

Also adding some tweaks will help you stay more focused on trading.

■ <https://t.co/HSmVxLxPNv>

# Full width for larger screen size!

## 3. Zerodha Scrip Plus

Zerodha fullscreen trading with brokerage calculator and analysis options

- Brokerage Calculator
- Full screen trading
- Marketwatch and Holdings scrips analysis

■ <https://t.co/ZOmAcvamRh>

#### 4. Jarvis - Zerodha Trading helper

Jarvis helps in managing your risk by giving you a consistency of pre-determined stop loss % and risk per trade.

Once you set these values in the plugin then it automatically sets the quantity of the trade.

■ <https://t.co/qn2MvDkCdR>

The screenshot shows the Kite Zerodha website interface. On the left, there is a table of stock prices and their percentage changes. The table includes columns for stock names, their current prices, and percentage changes. The stocks listed are NIFTY 50, SENSEX, CDSL, BERGEPAINT, JUBLFOOD, AUROPHARMA, BANKNIFTY NOV 28500 PE, NIFTY NOV 12800 PE, NIFTY NOV 12900 CE, BANKNIFTY NOV 29000 CE, BANKNIFTY NOV 29200 CE, BANKNIFTY NOV 28000 PE, and RELIANCE.

On the right side, there is a popup window titled "JARVIS ZERODHA HELPER". The popup contains the following text:

Hello Trader  
 Your stock - MCX  
**WHATS THE PERCENT STOPLOSS**  
 % stoploss   
 Stock value   
 Stoploss   
 Risk per trade   
 Your quantity should be - 30  
 Hours of development and testing go into maintaining this extension. If you feel it's worth a couple bucks, you can [help feed my kitties here](#). I really appreciate it. <3

## 9. Cyborg

With this extension, you can:

- 1) Sort the stocks in current marketwatch by volatility.
- 2) Load market watch with list of different index stocks

■ <https://t.co/nhRp1DiPF2>

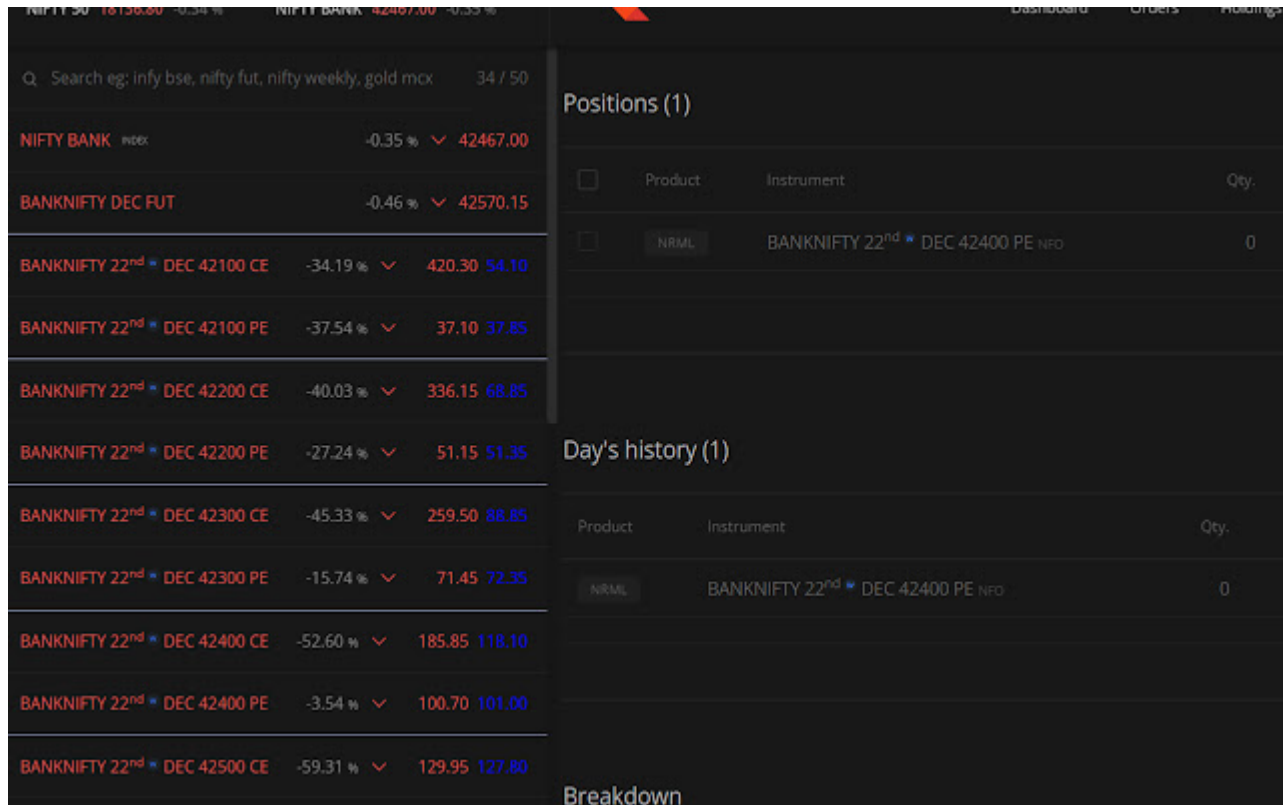

The screenshot shows the Kite Zerodha website interface. The top navigation bar includes links for Dashboard, Orders, Holdings, Positions, Funds, and Apps. The main content area displays a market watch table with columns for stock names, percentage change, and prices. A search bar is located above the table. A settings menu is open, showing options for sorting (A-Z, %), changing price (Close price, Open price), changing format (Percentage, Absolute), and checkboxes for Show direction, Show change, and Show holdings. A red box highlights the 'Run' button next to the 'IT' dropdown menu. A red arrow points to the 'Run' button. Another red arrow points to the 'Show holdings' checkbox in the settings menu.

## 10. Show Option Premium

Add option premium in Zerodha Broker Watchlist

This extension add option premium next to option price and it only works if you have corresponding index added in same watch list.

■ <https://t.co/52dbw8Avji>

The screenshot shows the Zerodha Kite interface. On the left is a watchlist with the following data:
