How to make $10,000/month on YouTube in 2023 as a beginner

(Starting with only $20)

- Thread -

1. Select a niche

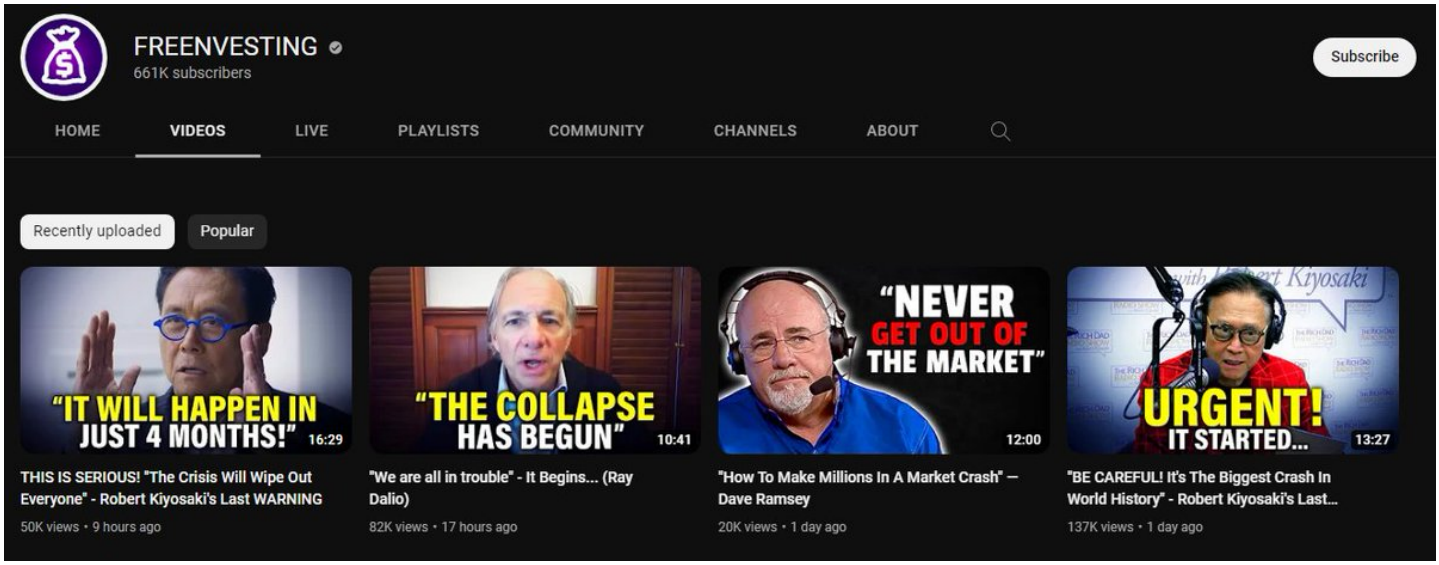

For our example, we will use the finance niche

There are many channels in this niche making $10k+ per month

All they’re doing is adding video clips to pre-recorded audio

I’m going to walk you step-by-step how you can do the same…

Here’s an example channel:

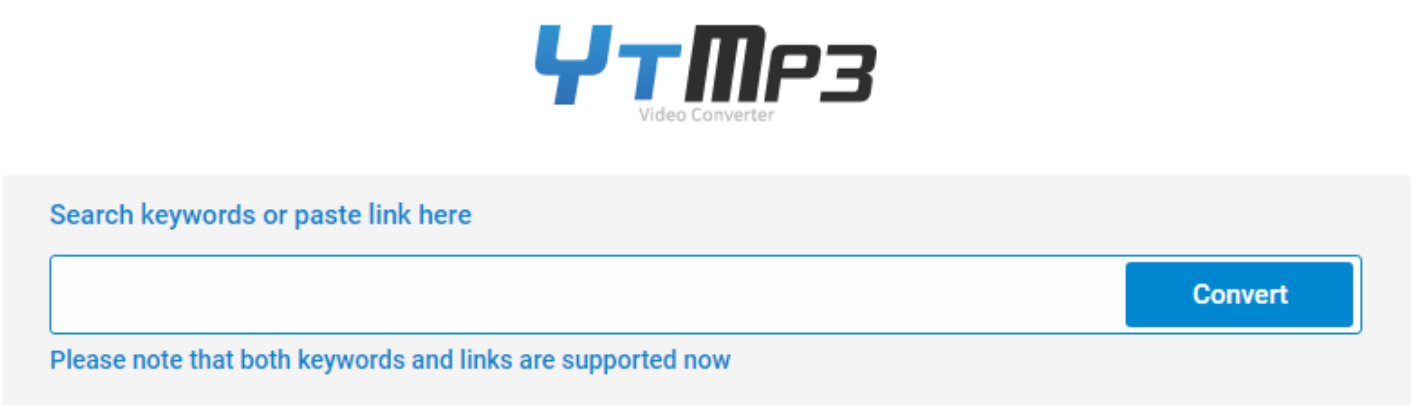

2. Find Voiceover

Search YouTube for the latest financial commentary

Find clips from people like:
- Warren Buffett
- Robert Kiyosaki
- Dave Ramsey etc.

Extract the audio from their longer-form content

Do this by pasting video URL into YouTube to MP3 converter:

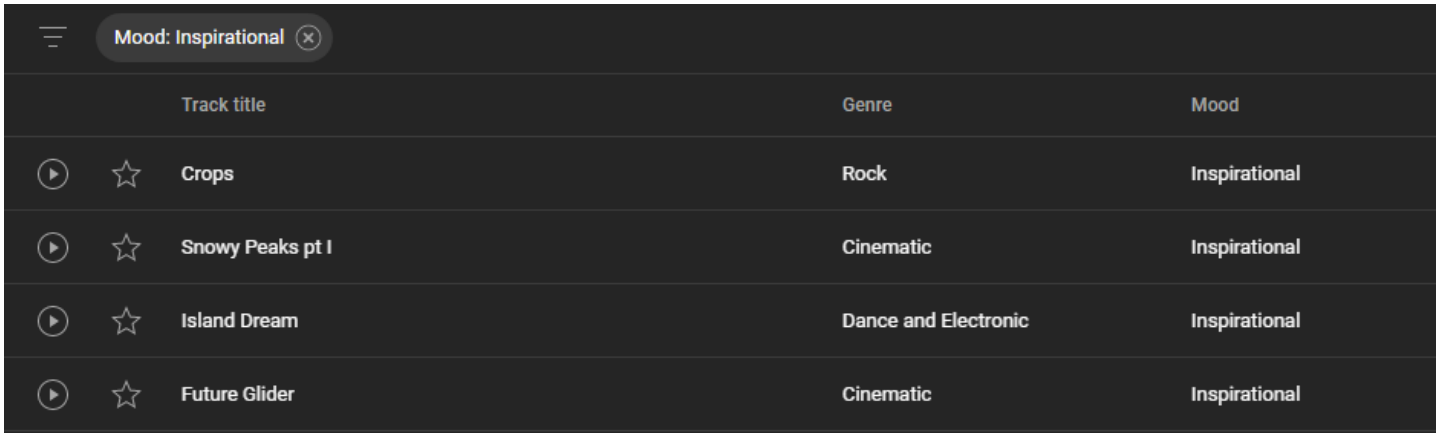

3. Find Music

Go into the YouTube audio library and sort music by mood

Select “Inspirational” and listen to the music demos

Select a track that matches your video content

Add in the credits in your video’s description and you’re set!

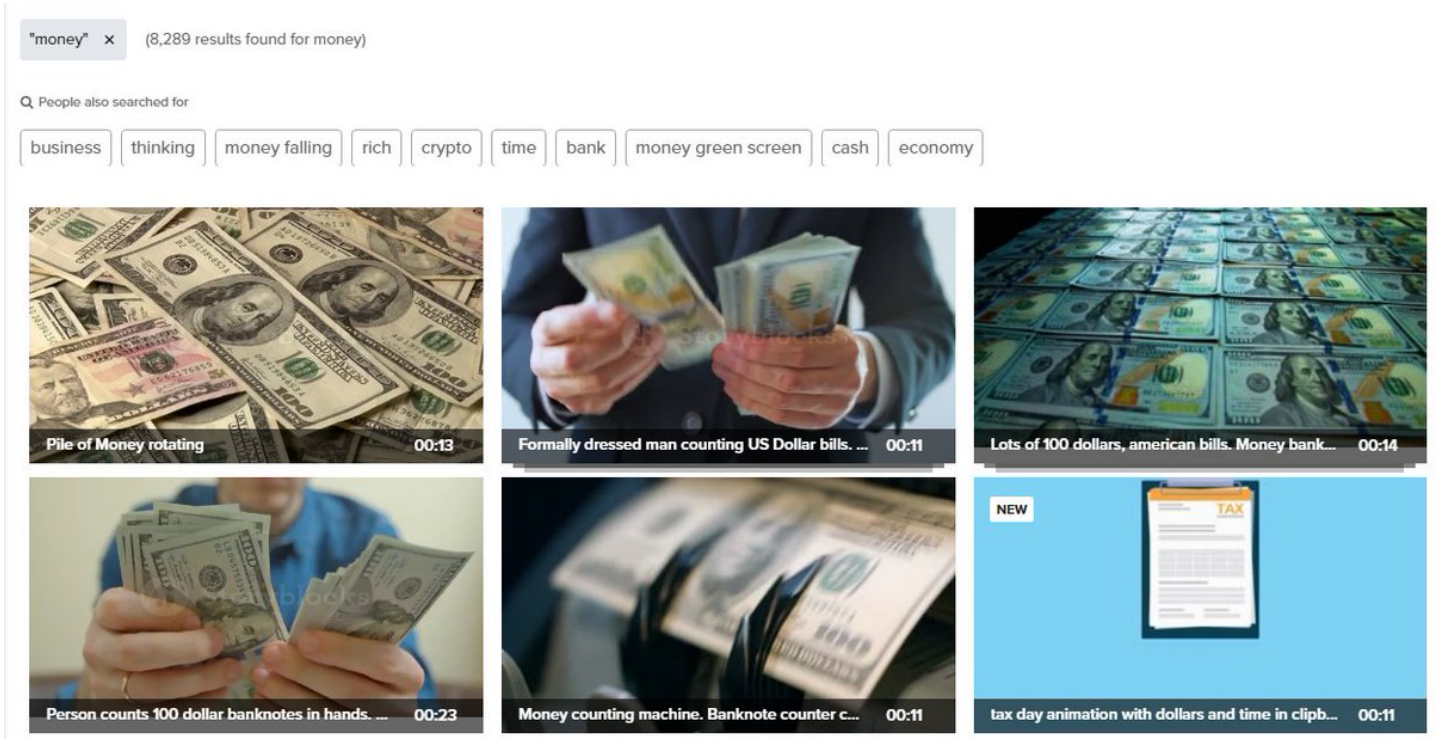

4. Find Footage

Sign up for Storyblocks for $20/mo

Search for business related clips

Gather enough clips for the full length of your video

5. Edit Video

To edit your videos, go to Clipchamp

Import your video and audio files

Edit to match video length to length of voiceover

Aim to make your videos 10-15 minutes long

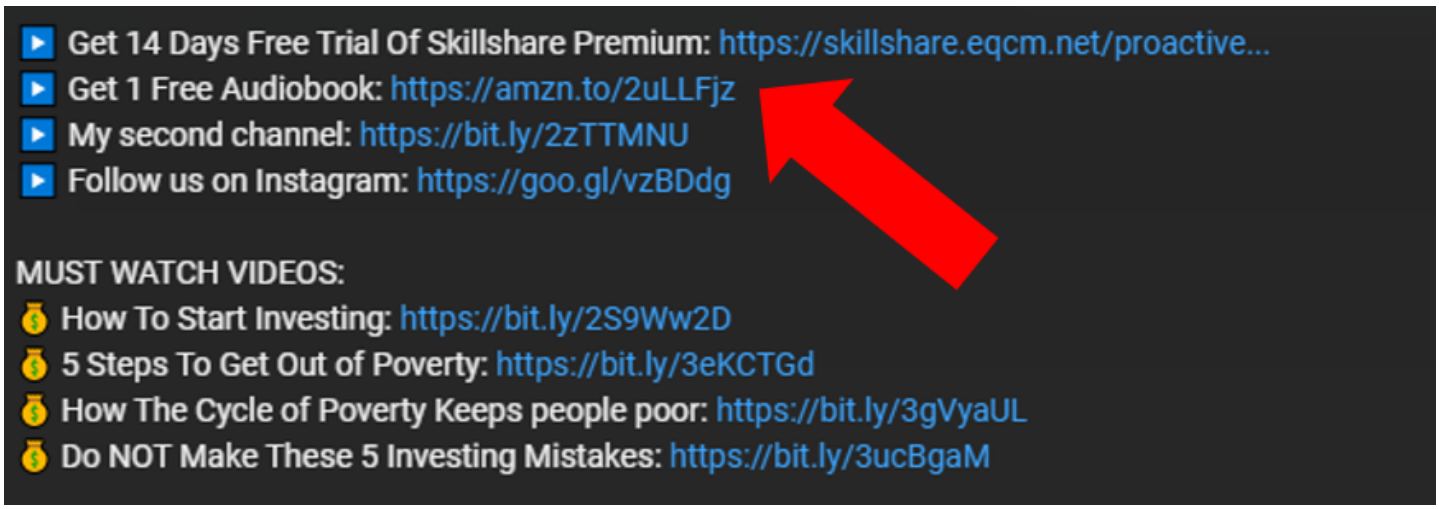

6. Monetize

To make $10k/mo on this channel you should promote an offer

Digital products and affiliate offers work best

Check out sites like Impact Radius or Commission Junction to find offers

Place links to your offers in your videos' descriptions and pinned comments

Here's how much a small channel can make:

20,000 monthly views x 2% conversion x $25 commission = $10,000

Getting to 20,000 monthly views only takes 4-6 months

That’s the power of YouTube…

Start building your own $10k/mo YouTube channel
