RIP website designers

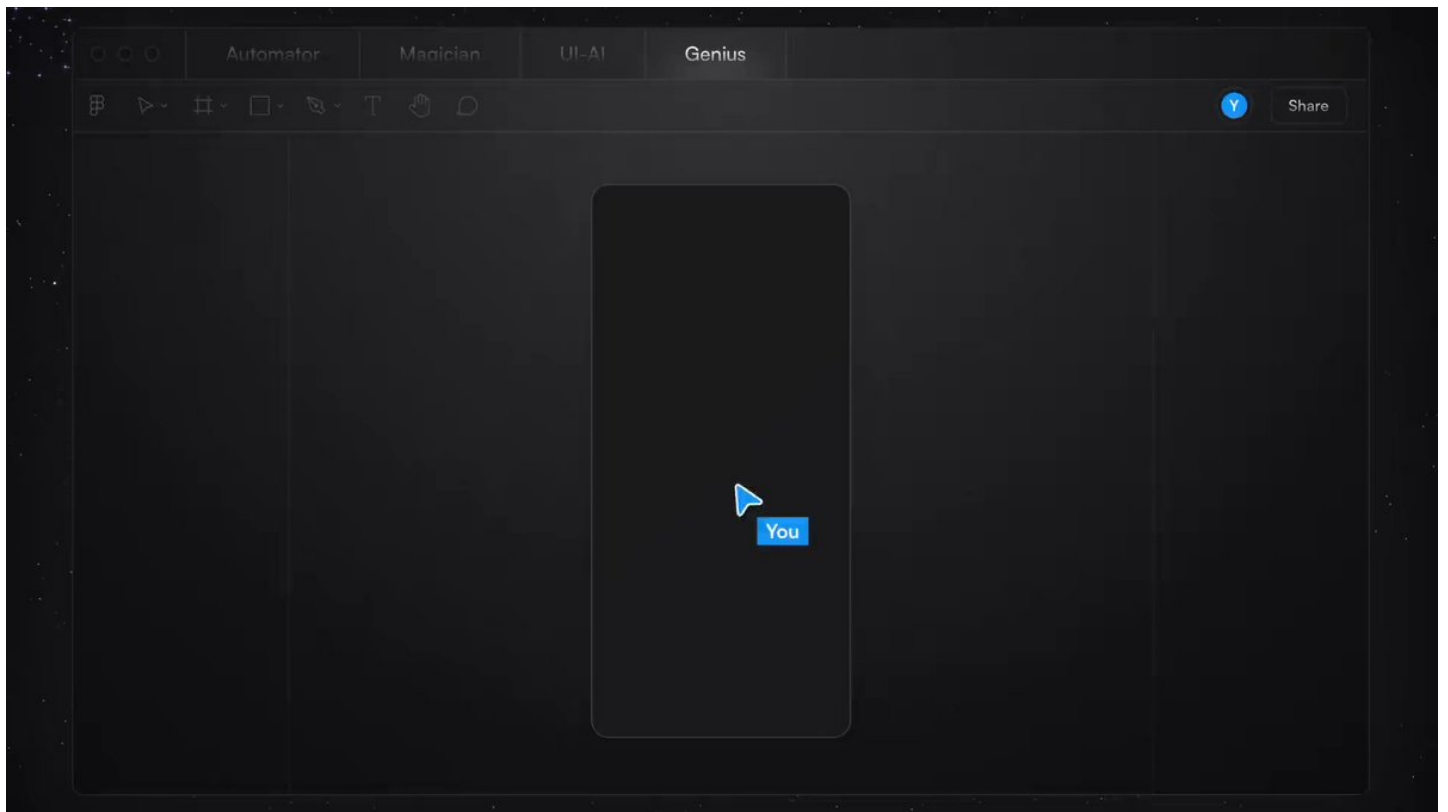

Here are a few new AI UI Design tools, that will flip the industry upside down.

1. ■ Introducing Genius, your AI design companion in [@figma](#) by [@diagram](#)

It understands what you're designing and makes suggestions that autocomplete your design using components from your design system.

Genius is coming soon. Join the waitlist → <https://t.co/5w2O99JPXY>

2. Generative AI takes a big step and comes to user interface design!

@Galileo_AI by @helnzhou & @arnaudai

Early access: <https://t.co/GbAkBhLVE6>

Describe your design...

Generate

3. The secret is out ■

Generate a multi-screen UI design from a single prompt with [@uizard](#) Autodesigner.

Want to be the first to try Uizard's new, groundbreaking technology? Head to <https://t.co/Ek5YWjXhfM> to sign up for exclusive access.

■ coming soon ■
