**APIs in general are so powerful.**

## Best 5 public APIs you can use to build your next project:

### 1. Number Verification API

A RESTful JSON API for national and international phone number validation.

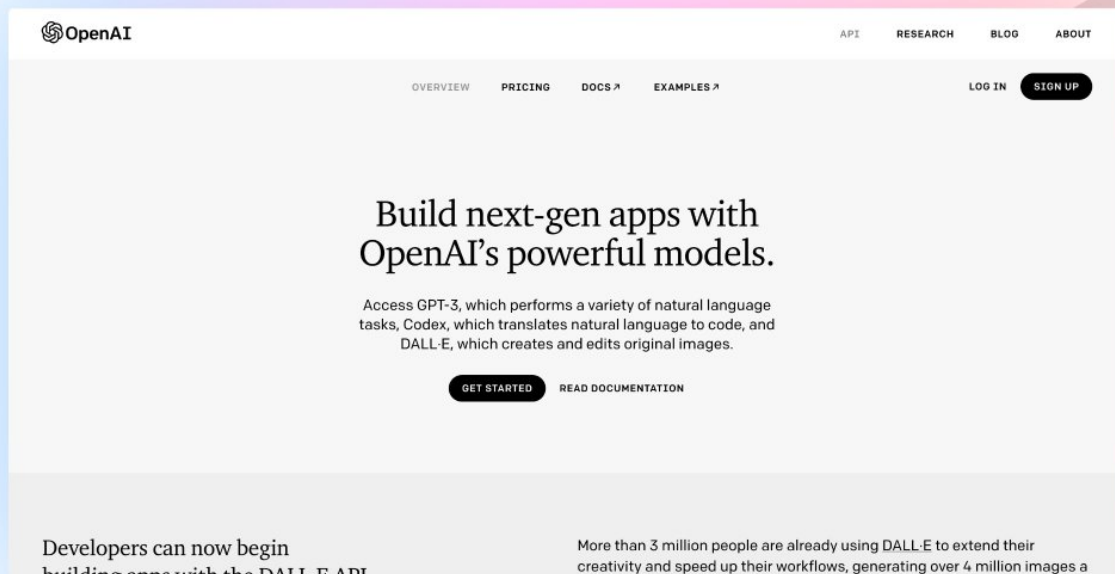

■ <https://t.co/fzBmCMFdlj>

### 2. OpenAI API

ChatGPT is an outstanding tool. Build your own API applications with OpenAI API.

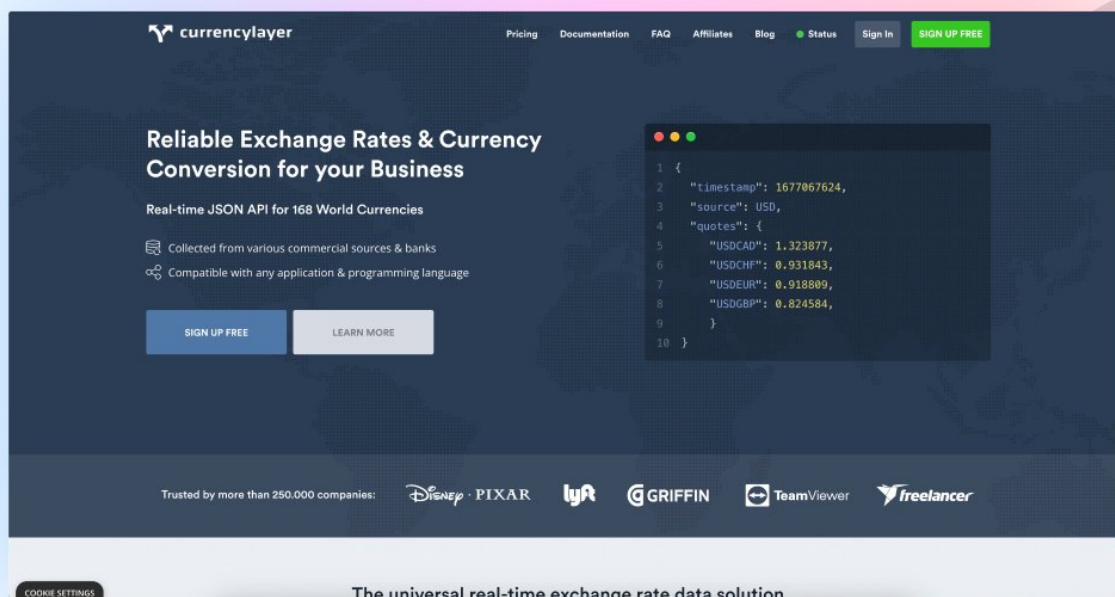

■ <https://t.co/TVnTciMpML>

### 3. Currency Data API

Currency Data API provides a simple REST API with real-time and historical exchange rates for 168 world currencies

■ <https://t.co/TRj35IUUec>

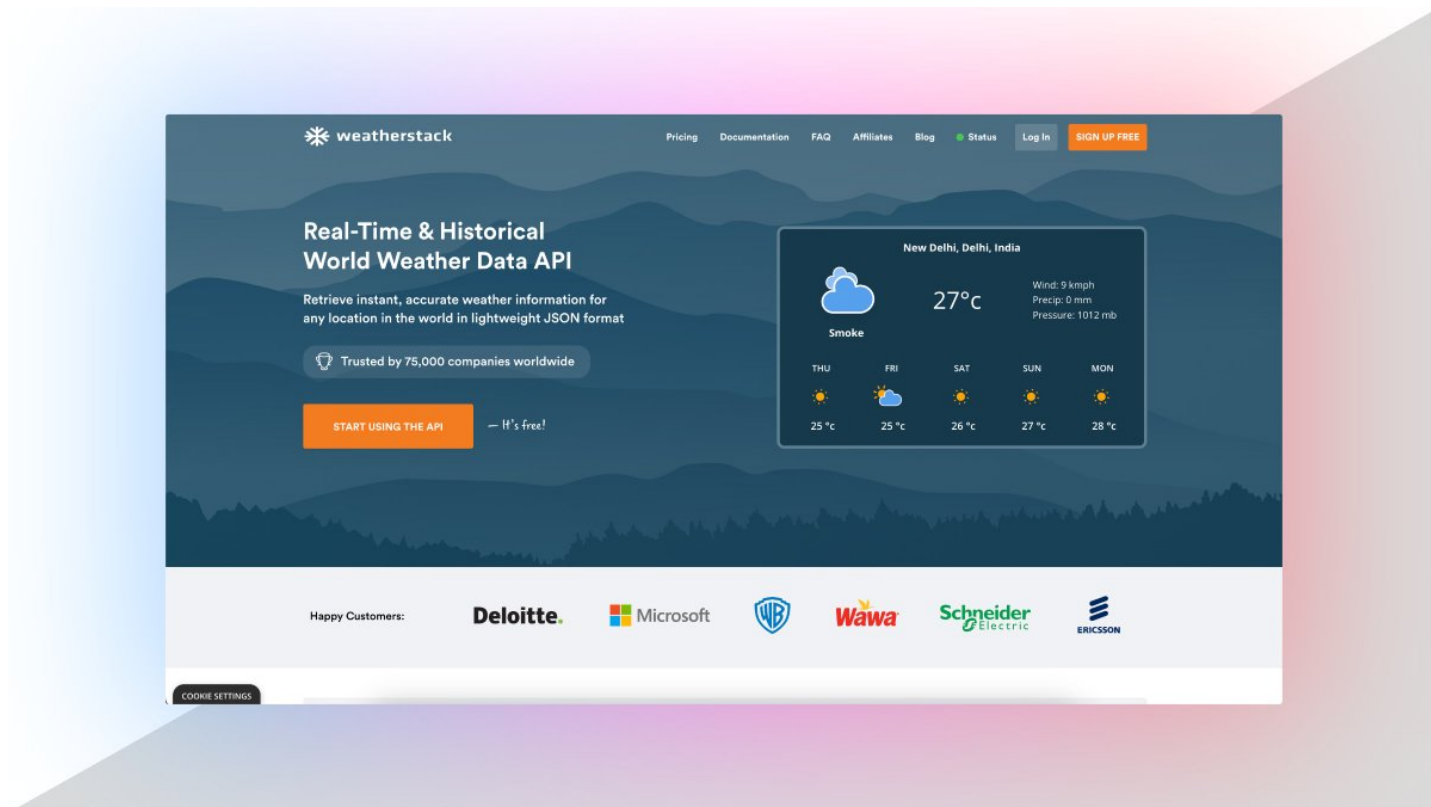

#### 4. Weather API

Real-Time & historical world weather data API.

Retrieve instant, accurate weather information for any location in the world in lightweight JSON format.

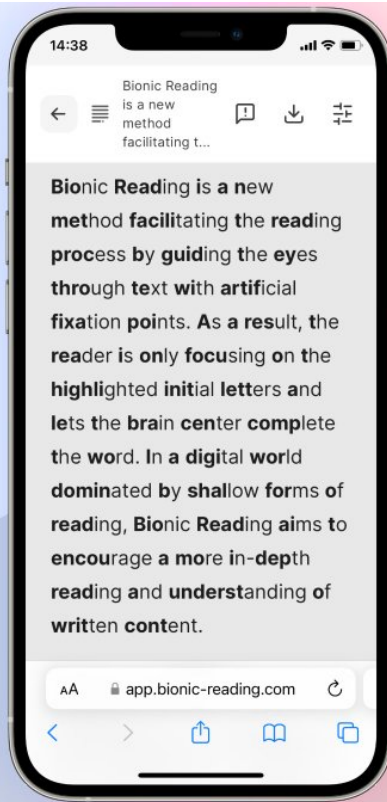

■ <https://t.co/DCY8kXqVIK>

#### 5. Bionic Reading

Bionic Reading® is a new method facilitating the reading process by guiding the eyes through text with artificial fixation points.

Bionic Reading  
is a new  
method  
facilitating t...

**Bionic Reading is a new method facilitating the reading process by guiding the eyes through text with artificial fixation points. As a result, the reader is only focusing on the highlighted initial letters and lets the brain center complete the word. In a digital world dominated by shallow forms of reading, Bionic Reading aims to encourage a more in-depth reading and understanding of written content.**
