#5 The modern Deep State. First player is Charles Hambro. The board C J Hambro & son, merged with Wallenbergs bank of Nordic commerce 1920 Married Marcus Dodde Wallenbergs ex wife. If Charles did not know Wallenberg, we are quite sure that his ex-wife did but we might be wrong.

1932 Kreuger looting this story alone should be enough for people to understand. Keuger was dangerous. He gave interest-free loans against a monopoly on the country's production of matches. It's not hard to see that he got the whole bank-gangster league against him and he died.

Ivar Kreuger founder of the Kreuger Empire, a threat to the banking hegemony's credit system and the introduction of BIS. In 1926, the idea of ■■BIS began to be introduced and it was Montague Norman (Ring) who was head of the Bank of England for 24 years who was part of this...

Ivar Kreuger

All Tolkien fans can start thinking about what Tolkien who criticized this with money making and the banker's power actually criticized in his books. Lord of the Rings and the towers. Tolkien was a professor of ancient Nordic languages ■■and if you

as a Scandinavian read the...

..books in English, you will find many hidden clues and riddles that unlock the possible meaning of the books. The books are overflowing with these riddles if you only understand Swedish, Norwegian, Danish. Who in America knows that Rivendale actually exists? Älvdalen..

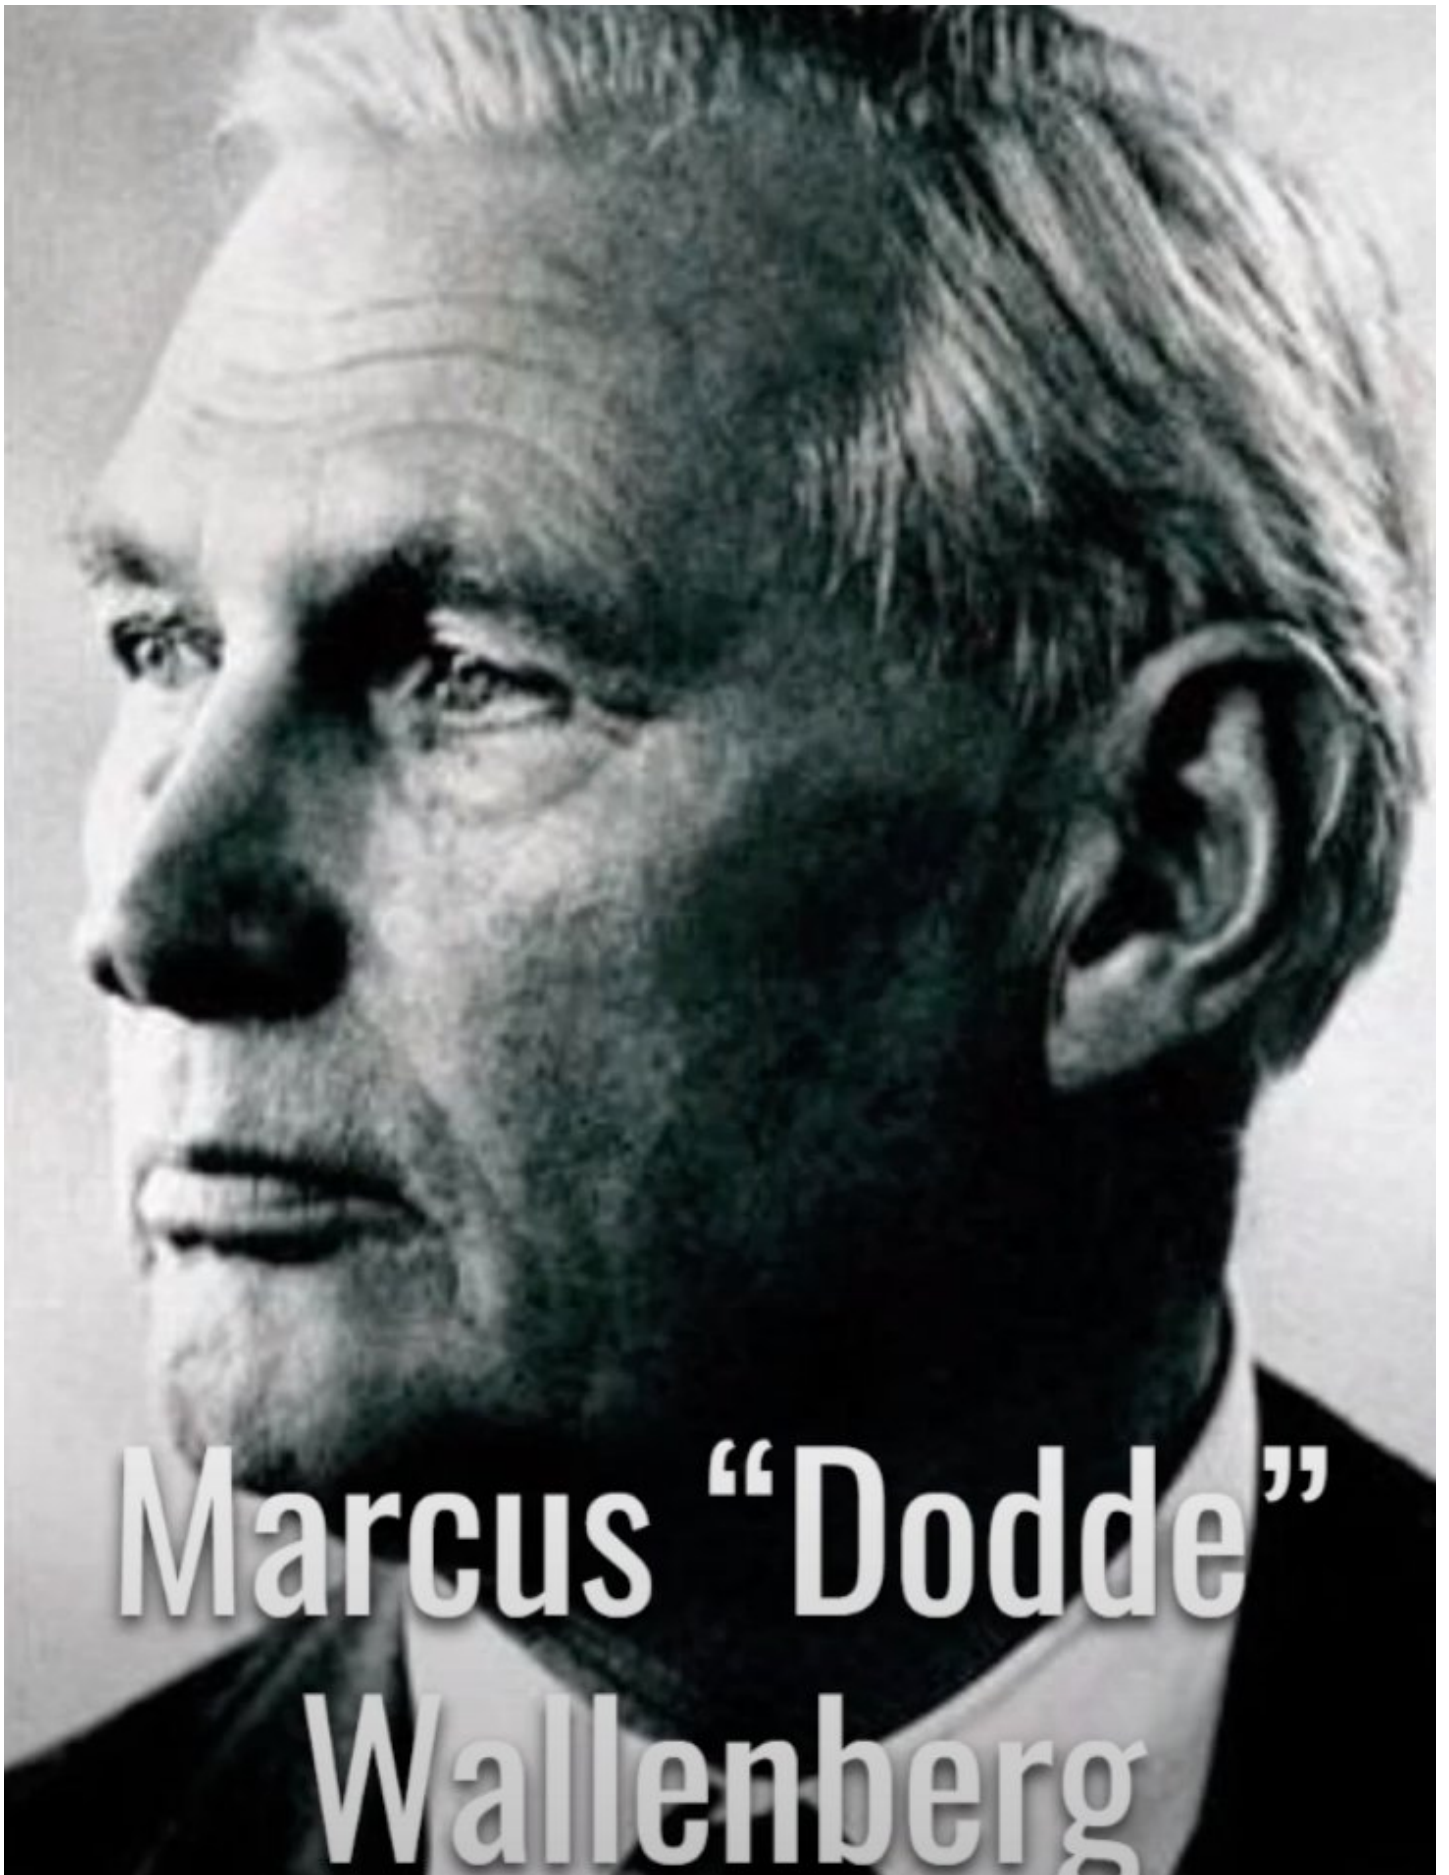

located in the mining district in Sweden and that the dwarves can be interpreted as the not so moral beings who dug too deep as they became so greedy. As a Swede, it is difficult to fend off the impression that Tolkien knew very well what Sweden's industrialists were doing...

and that comes later in the thread how Swedish industrialist unleashed the demons and terrified the world and created suffering all over the world. Back to Keruger he was a major owner of LM Ericsson and guaranteed to understand the importance of wiretapping and that it is...

...impossible to do business if someone is constantly listening in the background. Kreuger sold a holding in STT Sosthenes Behn to put it out of reach for Wallenberg but did not succeed. <https://t.co/mSG8Bq9WIA>.

Next player to enter the stage Marcus "Dodde" Wallenberg.

He was a member of the Credit's arbitration committee in 1932, the same year that Ivar Kreuger "committed suicide" in May. Ivar's death occurred 7 days after the death of Aristide Briand, the French Prime Minister...

...Briand was not fond of the so-called banking cluster of power. The Deep State was lucky, two critics of the credit system died suitably close to each other.

If it was luck or circumstances that were preceded by preparations is up to you to think about. On Pentecost...

...Takahashi, who was mentioned at the beginning of the first thread, was really lucky. Then the black dragon managed to assassinate the Japanese Prime Minister Innokai. Dodde now made LM Ericsson his foster child and there was perhaps a more long-term thought behind this...

... Dodde who had been brought up with the Hambro family but of course they did not know each other. Next player is Thomas Mckittrick. Now it's time to stop and think about whether world leaders like Trump, Putin, Xi, Erdogan and others understand this? They have access to...

Thomas Mckittrick

... both intelligence and the internet and can search, for example, telephone companies and their ownership structures. But we should probably assume that they have a better understanding than most people have and we need to listen carefully to what they say...

Mckittrick american banker, sat in the credits arbitration committee with Wallenberg and described Marcus Wallenberg as his mentor. Marcus Laurentius Wallenberg can be found in every single committee that has to do with Germany and after the war, he was responsible for the ...

...reform of the German banking system, to adapt the system to the BIS (introduced in 1931)

There is therefore good reason to suspect that Hitler was not at all part of the bankers' group and that he did not have such a large margin of maneuver but adapted. BIS still exists..

..today and the prelude to BIS was made before ww2. Hitler was a bastard but who pulled the strings? Mckittrick was a family friend of Allan Dulles and now it's time for the Americans to really focus and double check he connections. In any case, the Dulles and Wallenbergs...

...were acquaintances and probably more than that, even though they "did not know" each other at all. What Dulles has done for Wallenberg should make every American shout treason from the roof tops. Dulles worked for the law firm Sullivan Cromwell, which devoted much time to...
