#BellLetsTalk #Telus #Rogers #Videotron #Bell

#BigTelecom & #CapturedRegulators engineered rollout in a way that they can argue no #liability? #WTF!?

9. /

just take a look, #5G effects include #cancer #autism ■■

Despite widespread denial, the evidence that radio frequency (RF) radiation is harmful to life is already overwhelming. The accumulated clinical evidence of sick and injured human beings, experimental evidence of damage to DNA, cells and organ systems in a wide variety of plants and animals, and epidemiological evidence that the major diseases of modern civilization—cancer, heart disease and diabetes—are in large part caused by electromagnetic pollution, forms a literature base of well over 10,000 peer-reviewed studies.

If the telecommunications industry's plans for 5G come to fruition, no person, no animal, no bird, no insect and no plant on Earth will be able to avoid exposure, 24 hours a day, 365 days a year, to levels of RF radiation that are tens to hundreds of times greater than what exists today, without any possibility of escape anywhere on the planet. These 5G plans threaten to provoke serious, irreversible effects on humans and permanent damage to all of the Earth's ecosystems.

Immediate measures must be taken to protect humanity and the environment, in accordance with ethical imperatives and international agreements.

#5G #5Gfact(s)

Abstract

This article identifies adverse effects of non-ionizing non-visible radiation (hereafter called wireless radiation) reported in the premier biomedical literature. It emphasizes that most of the laboratory experiments conducted to date are not designed to identify the more severe adverse effects reflective of the real-life operating environment in which wireless radiation systems operate. Many experiments do not include pulsing and modulation of the carrier signal. The vast majority do not account for synergistic adverse effects of other toxic stimuli (such as chemical and biological) acting in concert with the wireless radiation. This article also presents evidence that the nascent 5G mobile networking technology will affect not only the skin and eyes, as commonly believed, but will have adverse systemic effects as well.

JR Jan Ravensbergen 1 minute ago

Many serious people (Frank Clegg, Dr. Paul Héroux, U.S. Sen. Richard Blumenthal are just a few...) have brought forward well-founded, deeply rooted, evidence-rich concerns about the public health dangers of #EMF — #5G in particular. Yet we hear very little about this basic science in our mainstream media. CBC, for instance, suggests above that there are "false narratives around #5G technology...." That's quite certainly true! One such false narrative is any suggestion that #5G technology can be considered safe. (Pardon the all caps): ***NO INDEPENDENT SCIENTIFIC STUDY OF #5G SAFETY*** has been conducted. NONE ZERO NADA! Today's CBC story — and what it fluffs off — prompted me to produce a Twitter thread that details only a tiny sliver of the array of evidence that #5G technology should be treated as harmful to human health, until and unless proven otherwise. This is known in science as the #PrecautionaryPrinciple. Our "regulators" in the federal government and those who oversee them in the Trudeau cabinet are ignoring and evading their responsibilities and mandates. #HealthCanada and #PHAC have to date proven shamefully servile to the interests of #BigTelecom: Bell, Telus, Rogers, Videotron... See SVP the full #thread in my Twitter account, under the hashtag #5Gfact .... of course I am spitting hot anger and cold fury. If you have a heart — or children or grandchildren — or any shadow of a conscience you will be outraged as well with this #5G rollout that is being imposed on us. I simply cannot fathom how #BigTelecom #BigWireless executives, in Canada and elsewhere, can look at themselves in the mirror or sleep at night. Nor their lobbyists in Ottawa. Likewise their lawyers. Do your own research, of course. But for a good start: #5Gfact @JanRavensbergen « less

Reported Biological Effects from Radiofrequency Radiation at Low-Intensity Exposure
(Cell Tower, Wi-Fi, Wireless Laptop and 'Smart' Meter RF Intensities)

Power Density (Microwatts/centimeter2 - uW/cm2)		Reference
As low as (10^{-13}) or 100 femtowatts/cm2	Super-low intensity RFR effects at MW reasonant frequencies resulted in changes in genes; problems with chromatin conformation (DNA)	Belyaev, 1997
5 picowatts/cm2 (10^{-12})	Changed growth rates in yeast cells	Grundler, 1992
0.1 nanowatt/cm2 (10^{-10}) or 100 picowatts/cm2	Super-low intensity RFR effects at MW reasonant frequencies resulted in changes in genes; problems with chromatin condensation (DNA) intensities comparable to base stations	Belyaev, 1997
0.00034 uW/cm2	Chronic exposure to mobile phone pulsed RF significantly reduced sperm count,	Behari, 2006
0.0005 uW/cm2	RFR decreased cell proliferation at 960 MHz GSM 217 Hz for 30-min exposure	Velizarov, 1999
0.0006 - 0.0128 uW/cm2	Fatigue, depressive tendency, sleeping disorders, concentration difficulties, cardio- vascular problems reported with exposure to GSM 900/1800 MHz cell phone signal at base station level exposures.	Oberfeld, 2004
0.003 - 0.02 uW/cm2	In children and adolescents (8-17 yrs) short-term exposure caused headache, irritation, concentration difficulties in school.	Heinrich, 2010
0.003 to 0.05 uW/cm2	In children and adolescents (8-17 yrs) short-term exposure caused conduct problems in school (behavioral problems)	Thomas, 2010
0.005 uW/cm2	In adults (30-60 yrs) chronic exposure caused sleep disturbances, (but not significantly increased across the entire population)	Mohler, 2010
0.005 - 0.04 uW/cm2	Adults exposed to short-term cell phone radiation reported headaches, concentration difficulties (differences not significant, but elevated)	Thomas, 2008
0.006 - 0.01 uW/cm2	Chronic exposure to base station RF (whole-body) in humans showed increased stress hormones; dopamine levels substantially decreased; higher levels of adrenaline and nor-adrenaline; dose-response seen; produced chronic physiological stress in cells even after 1.5 years.	Buchner, 2012
0.01 - 0.11 uW/cm2	RFR from cell towers caused fatigue, headaches, sleeping problems	Navarro, 2003

Stress proteins, HSP, disrupted immune function	Brain tumors and blood-brain barrier
Reproduction/fertility effects	Sleep, neuron firing rate, EEG, memory, learning, behavior
Oxidative damage/ROS/DNA damage/DNA repair failure	Cancer (other than brain), cell proliferation
Disrupted calcium metabolism	Cardiac, heart muscle, blood-pressure, vascular effects

Martin Pall, PhD

August 7, 2017

Dear California Legislators,

I am Dr. Martin Pall, Professor Emeritus of Biochemistry and Basic Medical Sciences at Washington State University. I am a published and widely cited scientist on the biological effects of electromagnetic fields and speak internationally on this topic. I am particularly expert in how wireless radiation impacts the electrical systems in our bodies. I have published 7 studies showing there exists exquisite sensitivity to electromagnetic fields (EMFs) in the voltage sensor in each cell, such that the force impacting our cells at the voltage sensor has massive impact on the biology on the cells of our bodies [1-7]. These papers are discussed in over 360,000 web sites which can be easily found by Googling (Martin Pall electromagnetic). I received my PhD at Caltech, one of the top scientific institutions in the world.

EMFs act by activating channels in the membrane that surrounds each of our cells, called voltage-gated calcium channels (VGCCs). The EMFs put forces on the voltage sensor that controls the VGCCs of about 7.2 million times greater than the forces on other charged groups in our cells [4,6,7]. This is why weak EMFs have such large biological effects on the cells of our bodies! EMFs works this way not only on human and diverse animal cells [1-7] but also in plant cells [7] so that this is a universal or near universal mechanism of action.

Thousands of published studies show biological and health effects from electromagnetic fields. We now know the mechanism that can explain these effects. The mechanism is a function of the electromagnetics of each cell—not solely about heating effects from the radiation (on which present FCC guidelines are based).

This new understanding [1-7] means we can debunk the claims of the wireless industry that there cannot be a mechanism for effects produced by these weak EMFs. The 20 years plus of industry propaganda claims are false. Rather the thousands of studies showing diverse health impacts of these EMFs can be explained. We now have a mechanism, one that is supported by both the biology and the physics, both of which are pointing in exactly the same direction. I am sending as a separate document a list of 134 reviews, each of which provides from 12 to over a thousand individual citations showing health impacts of low intensity EMFs, EMFs that the telecommunications industry claims cannot have such effects. **These 134 reviews and thousands of primary scientific papers they cite show that the industry propaganda has no scientific support whatsoever.**

The consensus among independent scientists on this is further confirmed by the 2015 (and later) appeal made to the United Nations and member states, stating that the current EMF safety guidelines are inadequate because they do not take into consideration non-thermal effects. This was signed by 225 scientists from 41 countries, each of whom had

Health risks from radiofrequency radiation, including 5G, should be assessed by experts with no conflicts of interest

LENNART HARDELL and MICHAEL CARLBERG

The Environment and Cancer Research Foundation, SE-702 17 Örebro, Sweden

Received April 8, 2020; Accepted June 19, 2020

DOI: 10.3892/ol.2020.11876

Abstract. The fifth generation, 5G, of radiofrequency (RF) radiation is about to be implemented globally without investigating the risks to human health and the environment. This has created debate among concerned individuals in numerous countries. In an appeal to the European Union (EU) in September 2017, currently endorsed by >390 scientists and medical doctors, a moratorium on 5G deployment was requested until proper scientific evaluation of potential negative consequences has been conducted. This request has not been acknowledged by the EU. The evaluation of RF radiation health risks from 5G technology is ignored in a report by a government expert group in Switzerland and a recent publication from The International Commission on Non-Ionizing Radiation Protection. Conflicts of interest and ties to the industry seem to have contributed to the biased reports. The lack of proper unbiased risk evaluation of the 5G technology places populations at risk. Furthermore, there seems to be a cartel of individuals monopolizing evaluation committees, thus reinforcing the no-risk paradigm. We believe that this activity should qualify as scientific misconduct.

Introduction

the World Health Organization (WHO) in May 2011 classified RF radiation in the frequency range of 30 kHz to 300 GHz to be a ‘possible’ human carcinogen, Group 2B (1,2), is being ignored. This has been recently exemplified in a hearing at the Tallinn Parliament in Estonia (3).

An important factor may be the influence on politicians by individuals and organizations with inborn conflicts of interests (COIs) and their own agenda in supporting the no-risk paradigm (4,5). The International Commission on Non-Ionizing Radiation Protection (ICNIRP) has repeatedly ignored scientific evidence on adverse effects of RF radiation to humans and the environment. Their guidelines for exposure are based solely on the thermal (heating) paradigm and were first published in ICNIRP 1998 (6), updated in ICNIRP 2009 (7) and have now been newly published in ICNIRP 2020 (8), with no change of concept, only relying on thermal effects from RF radiation on humans. The large amount of peer-reviewed science on non-thermal effects has been ignored in all ICNIRP evaluations (9,10). Additionally, ICNIRP has successfully maintained their obsolete guidelines worldwide.

COIs can be detrimental, and it is necessary to be as unbiased as possible when assessing health risks. There are

#mustread deep dive into #risks of #5G

Q. Wondering why #samestream media has such an obvious allergy to honest examination ■ of #5Gfacts?

A. #BigTelecom is huge #MSM advertiser

thankU .@newrepublic !!!

#MediaLiteracy #electrosmog

https://t.co/YtoxDrQOii

inch by inch, opposition to untested, intense #5G #EMF bombardment making inroads...

against #BigTelecom, #shameless #capturedregulators
including .@GovCanHealth .@FCC [& #sellout ‘scientists’ yes we sure see you #ICNIRP !!!]

#5Gfacts #electrosmog

https://t.co/Kg3kLrvh68

excellent summary of #5G issues ■ features many useful links

scope of this synopsis demonstrates how #coverup of #5Gfacts — including refusal to report #truth by #lamestream media — extends far beyond ongoing #ICNIRP .@GovCanHealth flimflam...

https://t.co/2I5hraF9c1

> The public and policy makers deserve to know the truth. The time has come and as a matter of urgency to demand the inclusion of truly independent scientists and to include the excluded scientific research when making critical and important decisions that may hold enormous ramifications beyond imaginable proportions for public health and the environment. It is not just the citizens at risk today, but future generations due to the epigenetic properties this agent carries.

read between the #lawyerly lines!!!

"Scientific disquiet does appear to be growing ... (over a) plethora of health issues, including nervous & endocrine system disruption & cancer.. scientific picture appears somewhat at odds" with #ICNIRP

d'OH! #5G

#5GFact(s)

#EMF

[yet all these indicators: #ICNIRP, #BigTelecom, .@GovCanHealth all in cahoots, telling us to ■ shut up ■]

https://t.co/wnAcTPLLxB

more on #ICNIRP as enabler for #BigTelecom & #braincancer

see excerpt below■

https://t.co/eVcdtNdTp0

#ICNIRP

what happens when #InconvenientStudies transgress #BigWireless #BigTelecom interests?

#BrainCancer #glioma links ignored by ... you guessed it ... @INCIRP

where is the line? appears they crossed it long, long ago....

> However, is it really so that the ICNIRP safety guidelines provide safety? Not necessarily. Just one example. Four case-control epidemiology studies have indicated that person using cell phone for 10 years for 30 minutes every day has an increased (by 40%, by 100%, another by 100% and by 170%) risk of developing brain cancer – glioma. What is of paramount importance, but not much elaborated publicly, all persons enlisted in this research were using regular cell phones that were purchased in shops. It means that each and every phone was in compliance with the ICNIRP safety guidelines (!). However, use of such safety-guidelines-compliant cell phone led to an increased risk of developing glioma. It means that the ICNIRP safety limits do not protect form the health effects of RF-EMF emitted by the phone compliant with safety guidelines. Also necessary to mention that in its new, 2020 updated, safety guidelines ICNIRP completely dismisses the results of these case-control epidemiology studies. Simply put – these results do not exist for ICNIRP.

some ways to at least reduce personal & family #EMF exposure while we push (hard!) on .@GovCanHealth & @FCC

they MUST stop rolling over on #5G #health risks to enrich #BigWireless #BigTelecom

#CapturedRegulators #ICNIRP
#cancer #autism #CorporateScum

https://t.co/ArDf3NKeKx

even for #pathetic #PopMech this■ = remarkably feeble #Propaganda101 exercise

—> so obvious that (thin!) copy written solely to support unwarranted misleading '#fauxomniscient' #5G headline....

[reminds me of their fumbled #911Truth '#debunking'!]

https://t.co/YYGHQ2nY8Y

congrats .@Wera_Hobhouse & thanks for your #wisdom. #5G is being crammed down our throats with #RecklessDisregard by #ICNIRP & #BigTelecom
