(1) Kushner is worth \$324 million.

(2) Since 2016, Kushner has connived, with Saudi help, to force the Qataris (literally at a ship's gunpoint) to "loan" him \$900 million.

(3) This is consistent with the Steele dossier.

(4) Kushner is unlikely to ever have to pay the "loan" back.

Jared Kushner has a net worth of almost \$324 million. But it appears that he paid little or no federal income taxes from 2009 to 2016, according to a review of confidential financial documents obtained by NYT.

2/ So as you read about his tax practices, you should take from it that it's practices of this sort that ensure that he's able to extort money from foreign governments while Trump is POTUS without ever having to pay the money back. It also explains why he's in the Saudis' pocket.

3/ It's why the Saudis *say* he's in their pocket. It's why emoluments and federal bribery statutes matter. It's why Kushner was talking to the Saudi Crown Prince the day before the murdered Washington Post journalist was taken. It's why the Trump administration now does nothing.
