Inspired by the recent topic [#BillClintonIsAPedo](#), I would like to share with world the truth behind the Serbian province [#Kosovo](#), today a partially-recognized state, yet protected by 1244 UN resolution and the constitution of Serbia.

TRADE WAS MADE BETWEEN  
ALBANIANS AND CHINTON  
FOUNDATION BY SENDING  
CHILDREN'S ORGANS AND  
SERBIAN BABIES IN  
EXCHANGE FOR SEPARATION  
OF KOSOVO FROM SERBIA

---

This story includes some of the crimes against humanity done by KLA, #ClintonCrimeFamily and its administration, as well as the crimes of a #deepstate members who're still, 2 decades after, holding all the strings in the Balkan region, including #Serbia.

#BillClintonIsAPedo ■

A biography of Hillary Clinton, written by Gail Sheehy and published in late 1999, stated that Mrs. Clinton had refused to talk to the president for eight months after the Monica Lewinsky scandal broke. She resumed talking to her husband only when she phoned him and urged him in the strongest terms to begin bombing Serbia; the president began bombing within 24 hours. Alexander Cockburn observed in the *Los Angeles Times*,

There was very well organized mass propaganda brought to you by the mainstream media which aim was demonization of Serbs in order to justify the #NATObombing.

The truth was completely different ■

In Feb 1999 Madeleine Albright, talking to CNN, reported to the US public the need for "humanitarian" intervention on Kosovo, Serbian province. She had no evidence to support her claim, yet the mainstream media were broadcasting it as fact, without any research or collaborating facts.

Clinton's administration turned all the media networks into tools of propaganda in order to manipulate both the US citizens and the rest of the world, through images and distorted facts, making them believe that there was a genocide being committed on Kosovo by the Serbs. Public opinion to support the attack became viral and, hence, many politicians, profiteers, corporations etc. have endeavored to hide the critical truth behind this bombing.

The attack on Serbia and Kosovo was needed as a justification for a deep state to be stationed in the Balkan region. The main agenda was to establish a security corridor for pipelines to transport oil from the Caspian Sea, through the Balkan region and onto the Mediterranean. Therefore, US intervened in the Balkans for oil values and corporate interests, not for genocide reasons.

Between June 1999 and March 2004. around 155 #SerbianOrthodox churches and monasteries were destroyed by Albanians.

Do you see similarities with recent events in the USA and around the world where #Antifa terrorists used to burn and destroy cities?

<https://t.co/YTMHbFsGVE> ■

Kosovo and Metohija, the heartland of medieval Serbia, of her culture, religion, politics and economy, experienced continuous waves of spiralling violence and forced migration. The Serbs see Kosovo and Metohija as the Serbian “Holy Land” with an impressive cultural and economic rise in medieval times.

Kosovo and Metohija are the cradle of both the Serbian state and church, as well as of the spiritual home of the centuries-old culture of the Serbian people. More than 1,300 monasteries, and other sites comprising Serbia’s cultural heritage are located there. The tangible and non-tangible Serbian cultural heritage in Kosovo and Metohija is an authentic and fundamental part of its national identity and Serbian major contribution to the cultural heritage of Europe and the world.

The Serbian long-standing position in this region is supported by numerous evidence. Apart from plenty of written historical sources, foreign and domestic, attesting to Serbian presence in the area, there still are in Kosovo more than 1,300 Serb Orthodox Christian churches, monasteries, monuments, and archaeological sites.

Never mind the legal technicalities, and the risks of adjudication: just go in there and grab it!

Why Kosovo? Follow the money! ■

By 1999 George Soros was pulled into the "humanitarian" propaganda and became a supporter of Albanian independence and ally to DioGuardi, who presented a Congress with a petition, signed by 40 prominent policy makers urging US intervention in the Balkans.

With the breakthrough of the Open Society and HRW, Soros was one of the main sponsors of the Belgrade radio station B-92. He founded Otpor, an organization that received suitcases of money to carry out a colored revolution on October 5, 2000. and overthrew not only president Milosevic, but the entire government of the truncated Yugoslavia and political officials who had ties to the former "regime". Since 2000, every single president of Serbia was brought to that position thanks to his close connections with US government and deep state.

Somewhat later, HWR was active in the trials before the Hague Tribunal, which - quite interesting - was not supported by almost any of the parties in the conflicts in the former Yugoslavia. Louise Arbor, who worked as a judge in The Hague, was working as well in the Soros Council for International Dialogue.

Unfortunately, #KosovoMetohija is not the only sanctity that has been taken from Serbia in the past 2 decades.

Besides #humanorgantrafficking done in a collaboration between Albanian #KLAfighters and #ClintonCrimeFamily, there were thousands of cases of missing children...

Besides the horrible destiny of the Serbian people who were taken to the Yellow house, since 2001 there have been numerous cases in Serbia on missing babies. The national authorities provided no information about the disappearances, stating only that the babies died shortly after birth.

Eventually, the parents of the missing babies filed criminal charges, but they were dismissed due to lack of evidence or expiration of statutes of limitation. All of this led the parents to suspect the involvement of organized crime because of similarities in their stories: the cases always involved doctors, paramedics and coroners, the disregard of protocols, and the fact that parents were not allowed to see the body of their child.

There have been as well plenty of cases of taking away children by the Center for social work from their biological or foster families have raised and sold across the Serbian borders, after which their trace is getting lost. If you get to know more about the way of taking away children, you will notice that the “procedure” is very unusual for this region.
