There's a lot of news around the #MadebyGoogle event, so we're putting it all in this thread for your reading pleasure!

First off, here's a handy list of everything Google announced: https://t.co/MlrD0G4rvR

Then check out the Pixel 3 announcements.

The phone now includes wireless charging, increased specs, an extra camera, and a whole load of camera improvements. https://t.co/4jlqTjnhpW

For a more information on the Pixel 3's camera though, we put together this primer for you https://t.co/MGLDRDGvPq

We were also lucky enough to actually try out a Pixel 3 – and we have the evidence to prove it https://t.co/1U1wq02B70

Now, one of the biggest complaints about the Pixel 3 has been that notch. Luckily though, we have a guide on how to get rid of the sucker https://t.co/uojbyU7RCH

For our last Pixel 3 piece, we explored an interested feature Google demoed: having the phone respond to telemarketers.

We can't wait to try this out. https://t.co/kpUjWYrtRh

What else did Google announce then? How about the Pixel Slate?

It's Google's first Chrome OS tablet, has 2-in-1 functionality, and looks like a solid mid-market device. https://t.co/Ons74gfnzL

It also announced the Home Hub. Basically, it's a screen on a smart speaker, but without a camera.

It's very similar to the Echo Show or the Facebook Portal, showing just how important this sector is to the tech industry. https://t.co/L2VMxpDLH5

On the topic of smart homes, Google unveiled its Pixel Stand.

This is a wireless charger that turns a Pixel phone into a smart device.

The phone's screen changes so it's easier to read from a distance and it works in a similar way to the Home Hub https://t.co/Ywexavgbxw

Google also updated its wireless headphones. With a wire.

Yes, you can now buy a USB-C pair of Pixel earbuds. As weird as that sounds, it's actually a pretty good idea. https://t.co/WEJSpi6Xau
