ANDDD IT'S DONE.

Clout Report: Crowdsourced data on hundreds of upcoming rappers.

We compiled a list of over one hundred upcoming rappers and used APIs and scrapers to get over 2,600 total data

Don't let the image fool you! Hear me out!

Features:

Sort, filter, and search by:

- Gender, age, location, record label, region
- SoundCloud follower data
- IG, twitter, and FB follower data
- YouTube subscriber data
- Spotify data

I think this is particularly useful/monetizable for:

- record labels looking for new talent
- concert/entertainment venues that want to gauge the size of the audience of an artists
- artists looking to collaborate with other artists
- finding artists "before it was cool"

We built this in 24 hours on stream!

Thanks so much to everyone who slaved away at googling for all of these usernames, ids, etc: [@AlecOfJones](#) [@jnjl](#) [@DigitalSparky](#) [@cameronrohani](#) and sorry for everyone i cant name

Rapper List

Many ups and downs.

Per usual, there's always someone trolling the stream. We had dozens of people editing the google sheet when someone kept deleting data and columns...

Luckily Gsheets has revisions..

Found some amazing new tools for building and prototyping quickly.

- <https://t.co/DzTE8ja5v2> for full-featured out of the box sortable tables
- [@Cruip_com](#) for free sexy landing pages

Ok now I had two beers @ 4am and officially drunk on stream
