9. Subak system is a water management system that originated in Bali, Indonesia. It is a complex system of reservoirs, canals, and terraces that regulates water flow between different agricultural fields. The system is based on the principles of sustainable agriculture and environmental conservation.

#Subak\_system

The Subak system is a traditional water management system that originated in Bali, Indonesia. It is a complex system of reservoirs, canals, and terraces that regulates water flow between different agricultural fields.
