Few concepts upon which day trading systems can be built upon

https://t.co/3eAoEqM7QQ up trending market look for pin bar with good volume
2.Rsi divergence and macd histogram divergence both at the same time on 3 min chart
https://t.co/qrAH9PZ6D3 = Low (15min)

1/7

4.ORB with 15 min candle stick along with support and resistance of previous 5 days
5.Pullbacks in Strong momentum (wide range candles + Volume) stocks
6.ORB with volatility contraction and then wide range candle breakout with volume expansion

2/7

7.Fakeout like spring and Upthrust for entry pullback with low volume
8.CPR analysis with standard pivots
9.PDH/PDL breakout with volume, vwap and RSI confirmation

3/7

10.Horizontal support/resistance from HTF and confirmation of acceptance or rejection in lower timeframe as reversal candlestick patterns with volume confirmation
https://t.co/75kykbExlg writing data and Put Writing data in correlation with price action

4/7

12.Pivots (Fibonacci) and Price action with volume activity
13.Ichimoku set ups with previous day NR4/NR7 scrips with pivots and volume as trading tools
https://t.co/JcwqOZS5L4 and rejections on 100/200 ema
15.EMA20 and rsi divergence with daily trend structure

5/7

https://t.co/HhlGdw4Fhu on Open + yesterday range/2 when ST (10, 2) is buy. Sell on Open - yesterday range/2 when ST (10, 2) is buy

6/7

All theabv points are taken from the question i raised in the following thread
https://t.co/fzgNpfD36P
All credits to the ones who commented
Use the info carefully
if one intends to create a system out of this, all proper methods to b practised which are otherwise in place

7/7

> U want to create a trading system for intraday.
> U begin to create a buy/sell logic
> based on the tools u trust,
> which u can backtest then
>
> whats ur trading system?
> How would u create one?
>
> whats ur tools?
> candlesticks?
> moving average?
> RSI?
> CPR?
> PDH/PDL?
> vwap?
>
> post ur comments
