**Suppose u r in a long trade in 5min TF,  
How would u assess trend is still intact  
and  
u can scale into the trade to maximize the profitability ?**

**1.**

**HH HL formation and pin bar with good vol at vwap or just abv previous low. ADX greater than 25**

**1/6**

**2.**

Low volumes on counter trend move and price not closing below Vwap

**3.**

HH and HL formation on 5 min time frame. Volumes expanding when making HH and low volumes when in LL. Price above vwap

**4.**

SuperTrend 10,2, for scale in at ST retracement

**2/6**

**5.**

a). Bullish PA when candle is at VWAP

b). Minimal Overhead resistance (Volume Profile can help) helps in making the stock to trend more easily

c). Can Scale in when Price retraces to VWAP during low volume period mid-afternoon and forms a Bullish candlestick

**3/6**

**6.**

a). Trend still intact: Slope of 20 or 21 EMA moving higher

b). Upscale: Price pullback to EMA with less volume followed by upmove with good volume

4/6

7.

- a). Should cross 5 EMA
- b). Above yesterday VWAP
- c). Possibly Ascending Triangle Break Out.
- d). If continued trend dont add
- e). If re test confirmed in intraday will add more

5/6

here is a question to trend following day traders

Suppose u r in a long trade in 5min TF,

how would u assess trend is still intact

and

u can scale into the trade to maximise the profitability ?
