One among the 108 Shiva temples, Taliparambha Rajarajeshwara Kshetram Prathishta is done by Parasurama. This is also a Shakthipeetham, where Sati Devi's head fell.

Shatla Puranam says that once

Parashurama going this way felt Shiva's presence in ruins. He wanted to know how this negligence happened. So Narada Muni who explained story to Parashurama. Parvati Devi gave 3 Lingams to Mandhata, Muchakunta and Shathasoman. Devi advised each of them to place the Lingam

in a place where no creature has died naturally or none has been cremated. Later after a long search Mandhata found this place matching and he did Linga Prathishta. But after long years Linga buried into earth. Later Muchakunda and then Shathasoman also performed same action here
